VIP QUICKCOAT®
COLOR STABLE, HIGH GLOSS,
ULTRA FAST COATING SYSTEM

Less downtime – better performance.
It's not that complicated.

INDUSTRIAL

WATERPROOFING

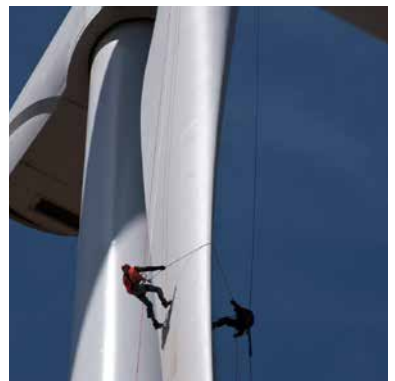

FLOORING

FEATURES AND BENEFITS OF VIP QUICKCOAT®

- Rapid application, fast curing, single application process – saves time and money
- Superior gloss and colour retention. UV stable
- Excellent adhesion to concrete without the need for a primer
- Spray applied using standard airless spray equipment
- Single application process – replaces traditional two and three coat systems
- Good flexibility
- Excellent resistance to most fuels, lubrication oils and hydraulic fluids
- Resistant to most chemicals, solvents, acids and caustics
- Wide application window – cold temperatures to humid environments
- Excellent thermal stability
- Very good bonding properties to concrete, timber, fibreglass and steel substrates
- Superior impact & abrasion resistance to standard epoxies
- Environmentally friendly – contains no VOC's

APPLICATIONS FOR VIP QUICKCOAT®

- Industrial flooring – warehouses, manufacturing plants, aircraft hangers, workshop floors, heli-decks
- Oil and Gas – External tank coatings, pipe coatings, infrastructure and plant coatings
- Materials handling – Steel infrastructure, earthmoving equipment, superior external corrosion protection of bins and hoppers
- Construction – Concrete sealing and coating, aesthetic pool and pond coatings
- Infrastructure assets – Bridge and jetty steel work and pylons, power transmission towers, water storage tanks, public plant and equipment

- | | | |
|-------------------------------------|--------------------------------------|---|
| 1. Thermal resistance | 4. Environmentally friendly VOC-free | 7. High chemical resistance |
| 2. Resistance to atmospheric attack | 5. Moisture insensitivity | 8. Superior tensile & structural strength |
| 3. Superfast reaction time | 6. Impact sound insulation | 9. High abrasion resistance |

VIP is a leading solution provider of high performance surface protection systems. Our integrated system approach includes substrate repair and preparation products, priming and pre-treatment systems, high performance coatings and superior aesthetic finishes.
