

## **Portable Access Control**

AUTOGATE converts standard shipping containers into a variety of configurations to create portable security and access control perfect for use on construction and building sites.

These converted containers have a wide range of applications for pedestrian and vehicular access control as well as time and attendance solutions.

Containers are available in a range of colours with an option to match corporate colour schemes.

Any Auto-Gate pedestrian control product can be installed within the unit and are easily integrated into all electronic access control software packages.

### **Portable Access Control Units Allow :**
