

## Full Height Fenceline Turnstiles

AUTOGATE has been manufacturing turnstiles in a variety of configurations for over 30 years.

These turnstiles have a wide range of applications for high security and high volume access control.

Available in 2 colours to match existing fencing, green or charcoal.

The stainless steel arms do not tarnish or scratch and the high quality finish will withstand continuous and prolonged use even in hostile environments.

The Autogate turnstile mechanism is extremely robust and has been designed and manufactured from the highest quality materials providing many years of trouble free service. Tests have shown the heads are mechanically indestructible.
