GATESTILE - The Gate that can't be left open

AUTOGATE has been manufacturing gates & turnstiles in a variety of configurations for over 30 years.

These gates & turnstiles have a wide range of applications for high security and high volume access control.

Available in a range of colours with an option to match corporate colour schemes.

The stainless steel components do not tarnish or scratch and the high quality finish will withstand continuous and prolonged use even in hostile environments.

In line with our research & development policy, AUTO-GATE has designed & registered the design of a "gate" that cannot be left open. The gate locks automatically & will not allow a breach of perimeter security irrespective of the position the gate is in when locking occurs.

This means that any attempt to hold the gate in such a way as to gain access after locking has occurred will not permit entry or exit thereby preserving the security of the site.

The AUTO-GATESTILE can be manufactured to site specific dimensions, large enough for beach equipment such as surfboards at beach access points from housing estates, or for single pedestrians use only.

Features

Available in single configurations only:

- Allows for unmanned secure entrances
- Ensures positive locking
- Passage in both directions
- Suitable for both indoor and outdoor applications
- Weatherproof header box protecting electronics
- Compatible with all access control systems
- Limits access to authorised persons only
- Can be configured to operate normally in event of a power failure with the power backup feature
- Hot dip galvanised frame for maximum corrosion protection
- Can be installed in a fence line
- Can be operated by means of solar power
- Passage frequency ± 10 persons per minute
- Will remain locked if power / controls fail

FULL HEIGHT TURNSTILES | WAIST HEIGHT TURNSTILES | HALF HEIGHT TURNSTILES | GLASS TURNSTILES | VEHICLE BARRIERS | SPECIAL NEEDS GATES | BOOTHS | INDUSTRIAL GATES | ROTADOORS | AUTOMATION | PEDESTRIAN BARRIERS

GATESTILE – The Gate that can't be left open

Technical Specifications:

- Power Supply : 12V DC
- Trigger Pulse time:0.2 – 0.75 seconds potential free contacts
- Current Draw : 25VA at 12V whilst activated
- Modular electronic control in 11-pin plug-in cartridge
- Auto time-out locking for security
- Home positioning control device
- Optional power back-up for 72 hours available
- Free-standing unit which bolts down onto concrete base
- Frame hot dip galvanised (painting optional)
- 100% duty cycle 12V DC solenoids, hard chromed PTFE armatures running in DU bushes for zero maintenance
- WARRANTY : 2 YEARS on mechanical components and 1 YEAR on electronic components

Ideal for use in:

- Fence line beach access
- Apartment blocks staff entry & exit points
- General access control where gates are used to allow others to access a site
