

## Benefits of the Ecosure range

- Complete coverage in two coats on a well prepared surface
- Helps reduce low level ozone and photochemical smogs, also low odour. To conform with the standard of Green Star.
- Easy clean-up and with the use of Dulux Trade Environmental Wash System totally environmentally friendly
- Extensive colour range allows maximum creative freedom
- Versatility in decoration towards a greener future

## Quality

Environmental benefits no longer have to be chosen at the expense of performance when specifying paints. The Ecosure range from Dulux Trade provides high quality, long lasting finishes with excellent application characteristics and colour choice.

Dulux Trade Ecosure can be tinted using the Dulux Trade Colour System to allow flexibility in colour decorating while taking the environment into account.

## Our continuing commitment to sustainability.

The development of the Ecosure range exemplifies the Dulux Trade commitment to reducing the ecological footprint of every aspect of our business, from sourcing raw materials to disposing of water.

We recognise that there are no quick fixes and that progress will only be made by making many small improvements.

Dulux Trade is a Silver founding member of the Green Building Council of South Africa and our specifiers have been trained on the Green Star rating too!

**Dulux believes that good sustainability practice equates to responsible business.**  
**We deliver this through our 'step towards greener' approach.**

## ecosure Plaster Primer

Ecosure Plaster Primer primes all types of masonry surfaces such as gypsum plaster, brick, concrete, cement and certain types of composition boarding.

- Ideal for Rhinolite
- Water based and highly resistant to alkali
- Suitable for both interior and exterior use
- Can be overcoated with both water and solvent based topcoats
- Seals porous plaster and provides a sound surface for topcoating
- Re-coat in 4 hours
- This product contains max 65g/L VOC which is in line with 2010 UE VOC legislation and contributes to Green Star SA

## ecosure Matt

Ecosure Matt offers performance that matches and in some cases exceeds that of equivalent matt emulsions, delivering favourable comparable levels of opacity and coverage.

- Water based
- High opacity
- Suitability for interior walls and ceilings
- Re-coat in 2-4 hours
- VOC lower than 16g/L (EU legislation 2010)
- Contributes towards points in the IEQ category of Green Star SA
- Pack size: 5L, 20L
- Available in 1,200 colours

## ecosure Silk

Ecosure Silk has been developed to deliver all of the advantages of water-based systems and achieve a professional silk finish normally associated with solvent based variants.

- Water based
- Washable
- Suitable for interior walls and ceilings
- Re-coat in 2-4 hours
- VOC lower than 16g/L (EU legislation 2010)
- Contributes towards points in the IEQ category of Green Star SA
- Pack size: 5L, 20L
- Available in 1,200 colours
