

## Lambdaboard Applications

### Vertical Cladding

<b><u>Facing:</u></b>	<b>WM / MN – (White Mineral / Mineral Natural)</b>
<b><u>Standard width:</u></b>	<b>1,220 mm</b>
<b><u>Lengths:</u></b>	<b>2,000mm up to 12,000mm</b>
<b><u>Thickness:</u></b>	<b>25mm - 100mm</b>
<b><u>Fixing detail:</u></b>	

- Lambdaboard 25mm to 50mm thick has a maximum span of 1800mm when placed over 3 girts spaces in a vertical application.
- Lambdaboard 60mm to 100mm thick will need longitudinal support such as T sections. Turned Vertically.
- Lambdaboard to be placed over 3 purlins / girts with the cladding over Lambdaboard.
- The entire system needs to be mechanically fastened through the cladding into the Lambdaboard and into the purlin.
