

PRODUCT SPECIFICATION

Twist planter

Stainless Steel or Fibreglass

Stainless Steel

- Grade 304
- Grade 430
- 3CR12

Dimensions

100cm high x 44cm wide

Available in

- Mirror
- Brushed
- Satin
- Powder coated various Plascon or RAL colours
- Fibreglass various Plascon or RAL colours

32cm liner specimen plant

- 304 grade stainless steel is suitable for interior and exterior use and is available in mirror finish and certain sizes in satin finish. If the product is intended for use in an environment that has a high incidence of corrosion then 316 grade stainless steel is recommended to ensure the longevity of the product.
- The 430 grade stainless steel is only for interior use in environments that have a low prevalence of rust. In South Africa we only recommend this product for interior use in Gauteng.
- 3CR12 - a utility grade stainless steel specifically for a powder coated /painted finish. Colours can be matched to the RAL colour system or Plascon/Dulux paint colours
- Fibreglass is ideal for a painted finish and can be used in a wide variety of applications - both indoors and outdoors. A Plascon or Dulux paint code will be required for colour reference. Please ensure that the colour is chosen from an original paint swatch available from most hardware stores, NOT A DIGITAL REFERENCE as this will not be a true reflection of the colour wanted. Paints are paint mixed specifically for each job and cannot change the colour should the reference given be incorrect, without costs being incurred.
