2014-2015

Smeg: redefining architecture in domestic appliances

What makes Smeg truly unique is their revolutionary view of domestic appliances as working pieces of art. This marriage of form and function is evident in Smeg's collaboration with leading architects. Design visionaries such as Guido Canali, Renzo Piano and Mario Bellini have all breathed life into Smeg appliances, sculpting architectural masterpieces for kitchens all over the world. Each of these experts has contributed succinctly to the Smeg way – Technology with Style – creating luxury distinctive appliances that express unique style by perfectly combining design, superior performance and attention to detail.

The elegance of these creations is perfectly complimented by ergonomics and performance, using the latest developments in technology to craft appliances that are truly ground-breaking and environmentally sustainable. Smeg kitchen solutions are the epitome of design, ergonomics and functionality, allowing people to fall in love with their kitchens over and over again.

The Smeg headquarters designed by Guido Canali

Contracting Solutions

This collection of appliances has been specially selected for suitability in the contracting market. These products combine elegance and advanced technology to provide style and reliability, satisfying the needs of the most discerning customer. With cooking, laundry, dishwashing, refrigeration and sinks, this catalogue Selection offers the contract buyer a complete kitchen portfolio.

Designers, architects, specifiers and kitchen specialists can now visit www.smeg.co.za for easily downloadable design resources such as technical drawings and 3D files of all Smeg appliances perfect for use when planning new kitchens.

smeg
technology with style

Timeless design. Made to be efficient.

MADE IN ITALY
PREMIUM QUALITY AND DESIGN

www.smeg.co.za

OVER 65 YEARS OF MADE IN ITALY

Founded in 1948 by the longest standing Italian family in the production of cooking appliances, **Smeg** is now the only appliance company with PRODUCTION EXCLUSIVELY IN ITALY. The company name, in Italian, is an acronym of: **S**malterie **M**etallurgiche **E**miliane **G**uastalla (in English it translates as “Metal Enamelling Factory based in Guastalla, Emilia”).

Emilia Region is known as the food valley of Italy and the home of technology and design.

Smeg Architects

What makes Smeg truly unique is their revolutionary view of domestic appliances as working pieces of art. This marriage of form and function is evident in Smeg’s collaboration with leading architects in the creation of their kitchen solutions. Design visionaries such as **Guido Canali, Renzo Piano, Mario Bellini** and more recently, **Giancarlo Piretti**, have all breathed life into Smeg appliances, sculpting architectural masterpieces for kitchens all over the world.

Each of these experts has contributed succinctly to the Smeg way - Technology with Style - creating luxury distinctive appliances that express unique style by perfectly combining design, superior performance and attention to detail.

Half load Flexi Zone:

The 1/2 load FlexiZone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed. Traditional half loads allow only one of the baskets to be used. Flexi-Zone can be found on most dishwashers, as either an option or a programme depending on the model.

Anti Drip System:

An exclusive anti-drip system is fitted to the front of the basket to prevent irritating drips on the floor as the basket is extracted. It is designed to improve the drying performance of the dishwasher.
