Control the lighting in just one click

Remote controlled lighting

Indoor micro lighting receiver RTS

The lighting micro receiver is a wireless radio receiver allowing to control lighting (maximum 500 W for halogen lamps or maximum 600 W for fluocompact/led lamps) in ON/OFF mode. It is installed in the wall-mounted unit.

Outdoor lighting receiver RTS

Associated with RTS transmitters or TaHoma, it allows the achievement of individual control for lamps. Flush surface-mounted installation.

Indoor lighting receiver RTS

Associated with RTS transmitters or TaHoma, it allows the achievement of individual control for lamps. Wall-mounted unit installation.

5-channel remote control for sockets & lamp holder

Turn on or off a light or an electrical appliance with a remote control
3 buttons: 5 Channel up/stop/down, the possibility to centralize the control of the accessories

Lighting receiver for RTS dimming

Associated with an RTS or TaHoma transmitter (ON/OFF function), it allows to control a lamp individually. Compatible with the whole range of Somfy RTS transmitters, recommended usage with Telis RTS for dimming. Compatible with lamps of adjustable light (see lamp manufacturer instructions), within the required minimum power indicated below. Possibility of favorite position.

Remote controlled ON/OFF lamp holder

The remote controlled RTS internal ON/OFF socket, associated with an RTS transmitter allows to put lights on and off. Centralizes and automates internal lighting with RTS or TaHoma remote controls.

An intuitive solution to make life easier

Explore a new way to control the solar protection devices. Just using a smartphone, the Connexoon Windows RTS application controls Somfy motorised solutions such as interior blinds, curtains, and rolling shutters, in just one click. Intuitive, smart, playful and in keeping with the times, the application offers greater comfort and peace of mind for a better home experience.

ONE SOLUTION TO MEET ALL NEEDS

- ☒ Does your customer have motorised solar protection, and wants to add connectivity?
- ☒ Does your customer have non-motorised solar protection, and wants to upgrade them?
- ☒ Does your customer have no solar protection, and wants some home improvement?
- Connexoon Windows RTS lets you offer your customers a solar protection management system using their smartphones.**

Advantages for your customers

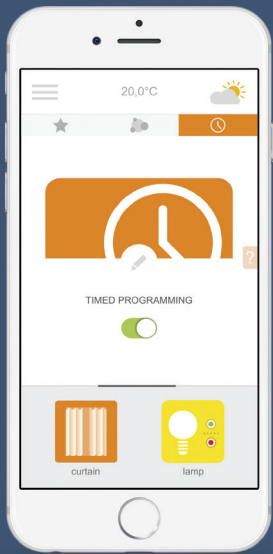

Connexoon Windows RTS is a simple solution for controlling all the solar protection devices with one click on the smartphone. Introduce your customers to the comforts of the connected life, with Connexoon Window RTS. And take advantage of the application's lighting management whilst making the most of their need for privacy and comfort.

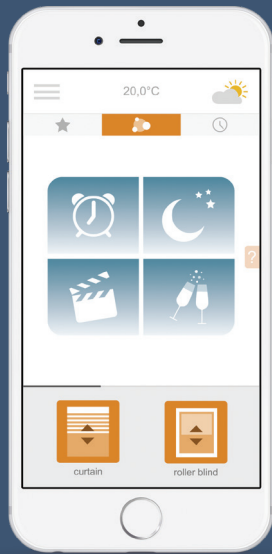

THE 3 KEY FUNCTIONS OF THE APP

CENTRALISATION
One click to open and close all the devices.

TIMER
Programming for the equipment at preferred times each day, to simulate presence.

AMBIANCE REPLAY
Run programmed ambiances with 1 click. For instance, run the "Film evening" ambience to close the sitting room curtains and turn on the lights.

Connexoon Windows RTS is compatible with Radio Technology Somfy protocol.

No need for a remote control. Control from the smartphone.

Use of Connexoon Windows RTS is recommended for up to 10 products.

Advantages for you

ADD VALUE TO YOUR OFFER
Stand out from the competition by offering connectivity right from the start. Whether it's a connected, interior blind or curtains...just one step and everything is connected and accessible. A small price for big rewards!

PLAY THE EASY-TO-USE CARD
With the Somfy Connexoon Windows RTS box, your customers will have a connected solution designed to be easy to use and accessible to everyone. Connectivity is so simple!

EASY TO INSTALL

Do you know how to sell motorised blinds? Do you know how to set up a remote control? Then you'll certainly know how to install Connexoon.

No need for an installation manual and no need for Internet connection on the site to install the box and pair the motorised devices.

Connexoon Windows RTS is installed in Plug and Play mode, with a simple Smooove RTS control point.
