

Move to  
**connected home**  
with Somfy solutions

**somfy**® Building happiness

# Connect your home equipments!

## Welcome to Home Motion!

Because your expectations in terms of quality of life, security, design or energy savings change...  
Because regulations change for a healthy house with respect for the environment...

Make the first step to the connected home.

The dream becomes reality: motors, controls, automatic systems and alarms interact to get the whole house moving, bringing you comfort and security, working intelligently with your environment.

## WHY CHOOSE HOME MOTION?

### To revolutionize your well-being

- With one click, you open all the shutters when you wake up, or set the angle of your Venetian blinds to benefit from the light, while maintaining privacy...
- One remote control operates the lighting in your garden, the awning for your terrace and its heating system...
- You can open the gate without getting out of the car...
- Simpler, easier, fewer daily chores: Home Motion changes your life!

ALARM & ACCESS

EXTERIOR SHADING

LIGHTING

CONTROLS AND SENSORS

INTERIOR SHADING

### To optimize your security

- With a touch on your remote control or mobile phone you can close all the entrances to the house, and activate the alarm system...
- Planning a trip? Activate the "presence simulation" scenario, automatically operating motorized devices and lights, as if the house is occupied.
- And for more peace of mind, monitor your house remotely, or check that your commands have been properly carried out on your remote control.

### To improve your energy savings

- The temperature of your living spaces is controlled automatically, as your blinds, roller shutters and other window coverings open and close, with a timer or sensor-controlled programming...
- You can change the heating thermostat on your smartphone, if you forgot to turn it down before you went out...
- Home Motion also improves your home insulation, for greater energy savings, a greener house!

Innovative technology

# io-homecontrol®

Easy and affordable technology for intelligent comfort

## Innovative technology to simply connect your home

- io-homecontrol® is a highly secure wireless technology included in a wide range of home equipment marketed by brands specializing in the residential sector.
- io-homecontrol® provides comfort, security and energy savings every day by making the automated or motor-operated equipment of your home more efficient: roof windows, roller shutters, interior and exterior solar screens, gates, garage doors, entrance doors, alarms, lighting, heating and cooling systems, etc.
- io-homecontrol® makes this equipment fully compatible, reliable and secure.

## For radio technology easy to live with

### 100% wireless

> Limited structural work.

### 100% compatible

> Control all devices with one remote control.

### 100% upgradeable

> Renovate or modernise at your own speed to suit your needs and your budget.

## io-homecontrol® adapts to your needs

**Scenarios** make it easy to define, programme and modify at will and with a single click of the remote control, a series of commands. You create and set in motion scenarios which adapt to your lifestyle.

### Good morning!

When you get up in the morning, the roof window opens up to ventilate the bedroom, the bathrooms and living areas warm up automatically to the desired temperature, and all the roller shutters open up.

### Cool summer days

In the summertime, as the sun heats the façade and the roof, the sun protections automatically roll down or shut to keep the house cool inside.

### Good night!

With a single click of the remote control, the roller shutters are closed, the front door is locked, the lights go off and the alarm is set. You know everything is safe because the little green light on your remote control display is flashing "OK". You are ready for a good night's sleep.

## Leading brands serving performance

Groupe Atlantic, Ciat, Secuyou, Somfy, VELUX, Philips, etc. All io-homecontrol® brands rely on the tried and tested quality of their products and their own recognized competence, to market millions of compatible products ensuring minimum maintenance and maximum security.

## When the product is already intelligent

The wireless technology built into all certified io-homecontrol® products means they are easy to install and simple to run. At last, all the benefits of home automation are available without the drawbacks: io-homecontrol® is a wireless technology, so there are no extra costs involved in wiring or installation.

# Reliable and **highly secure** technology for a more secure home

## Peace of mind - connected security

- Close up your house with just one movement: the alarm is set at once, the entrance door locked, windows closed, lights off, garage door and gate shut.
- If you are away for a weekend or a longer holiday, you can initiate a presence simulation scenario. Roller shutters rise and lower automatically, lights turn on and off at particular, preset times of day, etc. Off you go, with an easy mind.

### No risk of interference

The module scans the radio channel before sending data. If the channel is busy, it selects the closest available frequency at once.

## Why to choose io-homecontrol®?

One io-homecontrol® point is all you need to run every automatic component at home or away from home.

### A communicating installation

- io-homecontrol® combines both dynamic protection resources (roller shutters closing sequences, locking doors) and static warning methods (alarm, sensors). They are all controlled and coordinated automatically, in the home or remotely.
- So every order given is systematically checked, and you receive an instant confirmation on your remote control screen with a visual or audible signal (feedback).
- This means you can monitor the status of your equipment, and be sure that your installation can detect any obstacle and alert you at any time.

### Highly secure technology

- io-homecontrol® guarantees optimum security for your installation.
- A 128-bit symmetrical encryption key authenticates the source of every order sent from a remote control.
- Secure access is provided by a customized id and password, for remote control over the internet from a computer, smartphone or tablet.

### Compliant proven technology

- io-homecontrol® is compliant with European standard EN 300-220 that governs low-power radio communications in the 868 MHz to 870 MHz frequency range.

### MY PROJECT

#### Ask the right questions before you start

**Interior window, garage, veranda... which part of my house do I want to wake up?**

There are more solutions than you can imagine for all your devices... talk to your installer about what you want, and you'll get customized options instead of customized replies.

**What is my project: new build, renovation?**

At every stage in the life of your house there are different options, your Somfy installer will be able to guide you.

**What kind of control do I want?**

Wall-mounted, remote control, automatic systems, general home automation systems... you decide!

**Who do I contact?**

When it comes to your home, trust our partners! Trained in Somfy solutions, they can advise you, whatever your needs or lifestyle, and whatever the layout of your house. Before, during and after, Somfy is with you, helping to bring your projects to life!

# Dress and protect your **windows**

Roller shutter, external venetian blind...

There is a wide choice nowadays for dressing and protecting your windows. Every product has its own benefits, depending on your needs and your specifications, think about it!

Somfy has designed motorization and automatic control solutions to meet all your requirements, and also provide greater security, quality of life and energy savings. So whether it's a new-build or renovation, now is the time to ask yourself the right questions.

What are you looking for?

Greater security, better insulation, improved design?

What is your house like? Is it an old apartment, a detached house, a loft conversion?

Do you prefer lots of light, comfort, technology?

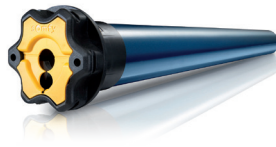

**Now you understand,  
it's you that matters!**

## Automatized roller shutters bring you more comfort

Move your motorized roller shutters and other exterior shading systems with a single click. You can programme or create scenarios to adapt the movement of your home equipments to your daily life.

### Oximo io

Intelligent bidirectional motor for for all kind of roller shutters. You will receive a feedback to your remote control.

### Chronis io

Programmable timer to automatically open or close your motorised equipment.

### Smoove io wireless wall switch

All it takes is a light touch on the Smoove facia to create the movement you want. New "Touch" technology to control or adjust natural light.

# Mastering excellence remote controls

for roller shutter, external venetian blind...

## Naturally Intuitive

Just touching the screen gives you perfect control over all your home equipment: lower rolling shutters, adjust the Venetian blinds, open a patio awning, open the gate...

Everything is simple, clear and immediate: pairing, configuration and piloting without a manual. Trust your intuition when installing and using Nina! Designed to fit naturally in the hand, inviting you to pick it up.

## Naturally Attractive

NINA is designed to be soft and inviting to the touch: soft feel, smooth curves. NINA lets you customise to suit your preference, and blends with the most elegant of décor.

## Nina, evolving to meet your needs...

Blinds, shutters, garage door, gate, lights, alarm, Velux, pergola...Nina recognizes and helps you adjust and control all of your equipment, to provide ultimate comfort in your home. Nina uses io-homecontrol® technology for enhanced ease and performance.

### Nina io - Group remote control

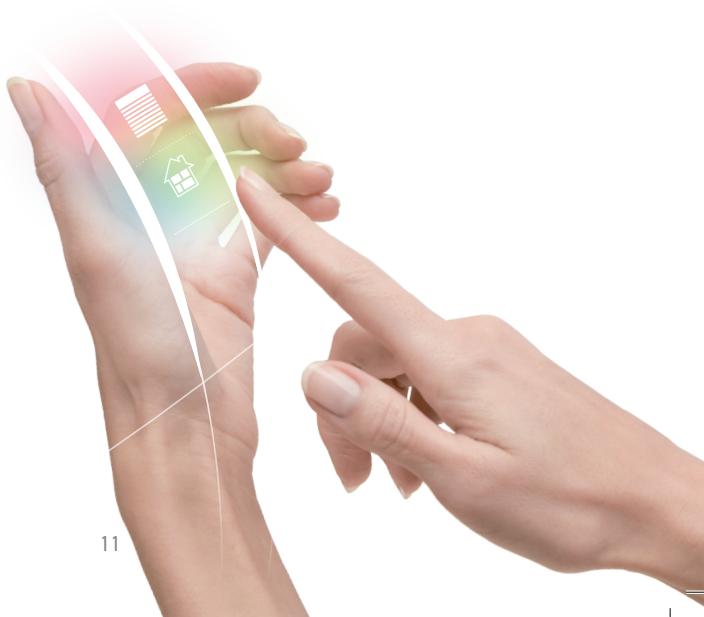

60-channels and 30 groups

Nina is the new intuitive and attractive remote control of Somfy. You can easily control your motorized equipments and lights in groups or individually. The large touchscreen makes operation a pleasure.

### Nina io Timer

Nina Timer includes an additional variant and an integrated-timer. You can easily create scenarios and you have plenty of possibilities to create your own living environment.

Through five interchangeable cover the elegant radio transmitter can be color-matched to any decor. It is battery-free and has a stylish charging stand.

## Colour your desires!

Clear or dynamic colours, nice to the touch, the new Situo io collection has it all. Available in 1 or 5 channels, for individual or group control of blinds, rolling shutters and even lighting!

### Situo io collection

1-channel or 5-channels

Ideal for individual or centralized control of your blinds, rolling shutters and even your light!

Metal Orange

Metal Green

Titane

Smart and fun

# Lighting

Control your lights with your remote control...

## Lighting receiver ON/OFF io

Lighting receiver io allows the achievement of individual control for lamps.

## Lighting receiver variation io

Lighting receiver io allows the achievement and adjustment of individual control for lamps.

## Plug io

The io "ON/OFF" indoor plug receiver associated to an io transmitter allows to control by hookups an electrical product of your home.

# Live the indoor life **outdoors**

Patio awning, pergola, veranda

Expand your living space, nourish the art of living outdoors, open yourself up to the outside. Terrace with plants, flowers on the patio, garden... never have we been so inspired by these little touches of nature.

The way we arrange them suit every lifestyle: relaxing alone between light and shade, impromptu evening party, break from sport or a spiritual

moment in the open air... everyone has their own way of enjoying the space, their favourite way of having some fresh air!

With Somfy motors and controls, terraces, verandas and pergolas come to life, so you can benefit from all their advantages, for longer, regardless of the weather.

## Motorize your awning

and it will change your life. Your Patio awning lets you spend more time outdoors, protected from the heat of the day and the cool of the night.

### Wind sensor

The Eolis WireFree io Sensor automatically controls your io motorized products based on current weather conditions. Automatically protects your awning or exterior screen when wind is detected.

### Sun sensor

When the house is at the ideal temperature, the Sunis sun sensor automatically lowers your blind as the sun comes out.

### 3D wind sensor

With the Eolis 3D wind sensor, your blind closes on its own, whether you are there or not, if it becomes windy. It measures the wind impact on the awning for even greater efficiency instead of the wind speed.

As soon as the nice weather arrives, all our senses awaken and respond to the call of the terrace... The patio awning is an essential part of this outdoor space, providing protection from the sun. Stylish furniture, plants, lights, accessories... the living terrace exerts its charm, bringing family and friends together.

So much happiness!

+ activate/disable the alarm.

- Secure centralised closure function, using the "Home" button.

### **Keytis 4 io**

Pocket remote control for 4 devices.

### **Keygo io**

Pocket remote control for 4 devices.

## Garage doors

Be free of constraints

In addition to somewhere to park your car, the garage has many other functions... storage space, D.I.Y. workshop, rehearsal studio! Whatever your style of life, choosing the door that will resist break-in and bad weather for a start.

Somfy has made-to-measure, easy-fit motorization systems for further development, whatever the type of door chosen. The purpose? Improve security and lifespan, but above all do away with all those daily chores. All without effort, and of course, without getting out of the car!

### USEFUL INFO

*Do not neglect safety features. Some are mandatory (photo-electric cells, amber light), others optional... together giving you maximum security. Ask your Somfy installer for advice.*

## Gates

Discover a life of ease

In addition to provide protection, your gate immediately signals the style of house it conceals. Shape, colour, material: your choice!

Using a motorized gate powered by Somfy improves the security of your home, by eliminating from the daily chore of having to open and close it.

Just one click to open and close the gate, without having to leave the comfort of your car, or running out of the house to open up for visitors... what a lot of time and energy you save!

### USEFUL INFO

*Motorize without changing everything, it's easy! Solar power means there is no need for a line voltage connection. To choose the right motorization system, you have to allow for the movement (mechanical) of your gate, the force of the wind on it, the available space, and the quality of its installation. Ask your Somfy installer for advice.*

Who's knocking to your door?

# Video-phone

Choose an easy and secure solution

A color screen that lets you see who's ringing at the street panel, answer and let them in. You control the opening and closure of your motorized door or gate.

## V100

Video door phone

- Gate or door opener from home
- Connection to the external unit via two wires only (up to 100m): existing doorbell cables can be used.
- RTS technology

## Choose an easy and secure solution

More complete than an intercom, installing a video-phone lets you identify at a glance anyone who knocks to your door or gate.

### V200

Two-wire colour video door phone

- Gate or door opener from home
- Connection to the external unit via two wires only (up to 100m): existing doorbell cables can be used.
- RTS technology

### V400

Video Door Phone with image storage

- Gate or door opener from home
- Identification of visitors thanks to the image memory (up to 400 pictures), even in case of absence
- Direction of the camera can be adjusted for an appropriate visibility
- RTS technology

### V600

Video door phone with image memory and fingerprint reader

- Gate or door opener from home
- Identification of visitors thanks to the image memory (up to 400 pictures), even in case of absence
- Digital fingerprint to unlock door or open gate
- RTS technology

Move your access from your mobile:

## Welcome home

### TOP FUNCTIONS

#### Welcome

Open the gate and garage door and turn the lights on just before getting home. Close everything automatically once the car is parked. Thank you geolocalisation, welcome home!

#### Check access

Manage the alarm remotely, check access points and move them in just one click... for reassurance and to make your home safe, even when you are far away.

Enjoyment means being connected!

Switch your access to
