QUALITY GARAGE DOORS

SECTIONAL AND ROLL-UP GARAGE
DOORS AND DIGI AUTOMATION

Introducing the complete quality garage door solution

Hydro Garage Doors and Digi Automation have been synonymous with quality, reliability, attention to detail and superior finishes since 1983.

We offer a full range of quality doors, motors and spares to suit through **SBS** branches nationwide, supported by our national after-sales service.

Our products are used everywhere from factories to fire stations and from luxury homes to affordable housing. Hydro is committed to increasing the skills and adaptability of our workers and to developing

artisans in our industry through ongoing education and training. We also offer leadership and personal skills development programmes in disadvantaged communities to help reduce unemployment.

Hydro is the only end-to-end garage door manufacturer in South Africa with a national footprint that specialises in doors, automation and spares to suit.

STEEL SECTIONAL DOORS

We're proud to say that our steel sectional garage doors have been described as 'over-engineered' or the 'Rolls-Royce' of garage doors, with key features like "TRUE" anti-pinch hinging as standard.

The engineering of our sectional doors makes them one of the finest garage doors available. The value for money you get is unmatched.

We believe strongly in offering our customers and end-users the luxury of choice. Textured, thermally-insulated or open-back, standard high-strength or reinforced for extra security, Hydro can meet any challenge and every budget.

Sectional doors have proved themselves globally as the superior garage door design.

Garage doors play an important role in the aesthetics and appearance of a property and can contribute significantly to its curb appeal and therefore, its value.

In addition to its good looks, every Hydro sectional garage door is packed with an impressive array of under-the-skin strength, safety and security features.

Hydro sectional doors aren't just visually pleasing and exceptionally secure, but are low-maintenance and can be custom-made and painted to suit the appearance of any architectural style.

Note: Custom finishes, colours and sizes are readily available as special orders.

Sectional doors have many advantages over tip-up doors such as maximising the drive-through width and increasing the vertical clearance for 4X4's, caravans and MPV's.

Available in "open back" single skin or foam-filled doors, both offering high-quality, low maintenance, durable steel sectional panels.

STANDARD SINGLE SKIN DOORS

- True anti-pinch door and hinge technology
- High-quality AZ150 steel panels
- Top-quality hinges and hardware
- Superior spring design (min 10 000-cycle lifespan)
- Pre-punched mounting holes for simple assembly
- Custom sizes and colours available

FOAM-FILLED DOORS

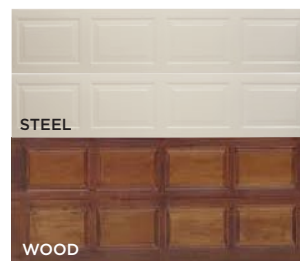

- Double skin increases strength and security
- Thermal efficiency – cool in summer, warm in winter
- Vibration-absorbing – smoother and quieter operation
- Proprietary hinge technology for durability
- Looks smarter from inside and easier to keep clean

WOODEN GARAGE DOORS

Our single and double garage doors come in raised-and-fielded and slatted styles, in either raw wood or pre-sealed in an imbuia or teak finish.

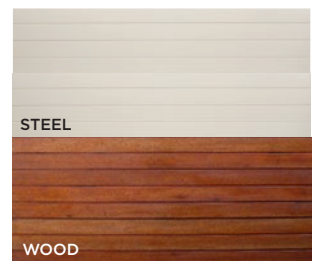

Our wooden garage doors can be bought separately or as part of a full kit including the door, all hardware and the door motor.

AVAILABLE STYLES

RAISED AND FIELDED PANELS (RFP)

Often called Georgian doors, RFP doors are often found in more traditional architectural styles. However, their timeless, classic finish can add a sense of elegance to any home.

LINEAR / FLUTED FINISH

Available in either broad or standard linear designs, fluted doors are well suited to contemporary homes. They can enhance classic homes by using colours that blend well with the surroundings.

STEEL ROLL-UP DOORS

Hydro steel Roll-Up doors are stronger, more durable with a superior design to most doors on the market.

Made from high-quality, corrosion-resistant 0.4mm Aluzink, our doors include a unique “roll-over lip” built into the tracking that makes them significantly stronger in heavy wind and prevents intruders from bending the bottom open.

All Hydro steel Roll-Up doors can easily be automated for added convenience and security.

Our Roll-Up doors boast superior quality features, install easily and can be adjusted for larger opening heights by simply increasing the length of their tracks.

Superior quality features

Hydro Roll-up doors are fully encased when closed, making them more attractive, durable and reliable.

Our doors are fitted with a high quality, double-throw lock unit, made with a 10mm round steel tube – instead of the thin flat bar commonly used on lower cost doors,

This makes it more durable, more reliable with improved security.

ROLL-UP DOOR FEATURES

- Woodgrain textured 0,4mm Aluzinc
- High quality long-life counterbalance springs
- Heavy duty aluminium bottom rail
- Double-throw lock

Double-throw lock.

Digi Automation solutions for Sectional and Roll-Up doors

DIGI ONE

Featuring a powerful 1,000N lifting capacity, this reliable and affordable automation system is ideal for all types of sectional garage doors.

Supplied standard with 2 Digi-E-key transmitters (with secure Keeloq® technology) as well as electronic obstacle sensing and manual over-ride.

Automated doors are controlled using a remote transmitter, for both personal safety and convenience.

DIGI 6

This exceptionally versatile automation system is easy to maintain with a number of class-leading features:

- Powerful and economical 24Vdc - 600N motor
- Dual sensor position sensing
- Simple to install – parts and accessories included
- Quiet and reliable operation
- Bright LED light with low power consumption
- Hydro reliability and product backup
- Includes 2 * E-Key code hopping remote controls
- Advanced adjustable obstacle sensing technology
