

Indoor Blinds

Privacy with a view

Our custom made interior screens are the premier solution to maximise the use of domestic entertainment areas. Especially well suited for estate living, these screens serve to keep you cool in summer and warm in winter. The high-quality fabrics used ensures that your furniture is completely protected from UV damage while maintaining daytime privacy without losing the view.

Ideal for blocking solar radiation in order to reduce the thermal heat gain factor of a building. This increases the comfort level of the occupants and decreases the energy cost of artificial air conditioning. The screens are manufactured with advanced solar fabrics that have different thermal, optical, mechanical and aesthetic properties to suit the specific application.

These applications include:

- ✓ Outward visibility
- ✓ UV blocking
- ✓ Thermal blocking
- ✓ Anti-glare
- ✓ Privacy
- ✓ Mechanical strength and stability
