

TECHFIN CONCRETE SURFACE DRESSING

CEMENTITIOUS CONCRETE SURFACE DRESSING (CSD)

DESCRIPTION

TECHFIN CONCRETE SURFACE DRESSING (CSD) is a blend of proprietary cements and resin which is used to provide a finish to unsightly concrete which very closely matches the appearance of fine finished concrete.

ADVANTAGES

- Apply by brush or roller
- Natural cement appearance
- Very durable
- Protects insufficiently covered steel

APPLICATIONS

- Improve the appearance of off shutter concrete
- Overcoat graffiti on concrete work
- Match old concrete to new.

PACKAGING

20 L KIT consisting of 25kg powder and 5litres of TECHFIN CSD LIQUID or a 4L kit consisting of 5kg powder and 1 litre of TECHFIN CSD LIQUID.

TECHNICAL DETAILS

Appearance	Natural concrete
Application	Brush or Roller
Yield	30kg kit yields 20 litres 6kg kit yields 4 litres
Coverage	4.5 to 6 m ² per litre Texture dependant

DIRECTIONS

Surfaces to be treated should be clean and free of dust, oiliness and paint. Soak the surface thoroughly with water before treatment. Dilute the supplied 5 liters of TECHFIN CSD LIQUID with 10 liters of clean water. Use this solution as the mixing water for the SURFACE DRESSING coat.

Mix to a smooth creamy consistency using the 15 liters for 25kg powder or 3 liters for 5kgs of powder. Apply with a brush or roller to a fine finish. Repeat within 24 hours to ensure a good bond between coats and complete coverage and obliteration. Cure by wetting down the treated surface twice after application and initial drying.
