

Bullet Resistant Doors

Chubb safes Bullet Resistant Security Doors offer a high degree of protection against physical and firearm attack in an area where the safety of staff and large sums of money are dependent on the door's resistance to sudden force.

Key Features:

- Available in three strengths for varying levels of resistance to sudden force.
- Firearm resistant material forms the basis of the solid 44 mm core which is then covered both sides by 3 mm thick oak veneer ply.
- The door is supplied complete with laminated bullet resistant glass set into deep rebates.
- Standard locking is by means of a Chubb safes mortice deadlock.
- Both sides of the door are fitted with an attractive natural anodised aluminium 'D' pull handle.
- Range of eye viewers to replace vision panel as optional extra.
- Heavy duty door closer.
