

Payroll Windows

Chubb safes Bullet Resistant Payroll Windows have been developed to protect counter staff against frontal attack from weapons such as firearms, sledgehammers and axes.

Key Features:

- Provides the cashier with the security of one single glass panel in front. The glass is seated into a minimum of 25 mm deep rebates and is secured top and bottom.
- There are no gaps or apertures as the system prevents direct access from one side of the glass to the the other.
- The vertical posts of the framework are constructed of natural anodised aluminium. Within the posts are two vertical tie rods that secure the entire structure to the base and add strength.
- The Payroll Window is glazed in 27 mm, 40 mm or 53 mm laminated bullet resistant glass. Alternative levels of security are offered to suit the level of protection required.
- The Payroll Window is designed for the transfer of bulky items, such as bags of coins and large bundles of notes. The station has an internal depth of 105 mm, 300 mm wide and 400mm high. The clear perspex sliding cover, controlled by the cashier, can be secured into position when the unit is not in use.
