

NT File

The Chubb safes filing cabinets are designed to fully meet your requirements for high quality, high protection and large capacity storage. All cabinets are tested to the highest international standards.

Key Features:

- Quality document protection using high specification materials.
- Tested to NT Fire 017 standards and certified by UL for protecting documents from fire for 60 or 120 minutes.
- Customisation of products is generated through the various high fittings.
- Each drawer is protected from fire. Even if one of the drawers is accidentally left open, the other closed drawers are still protected by the built in fire resistance partitions.
- The drawers are extendible for full drawer access.
- A shock absorbing plinth allows maximum impact absorption in the event of a floor collapse in a building fire.
- Pilfering of a locked drawer via an open drawer is protected against by means of a steel plate between each drawer.
- Other locking options available
