

BULLET RESISTANT
DOORS PROVIDING
SECURE ACCESS
CONTROL IN HIGH-RISK
ENVIRONMENTS

ARMOUR

A RANGE OF BULLET RESISTANT DOORS ENSURING
EXTRA PROTECTION AGAINST PHYSICAL ATTACK

KEY FEATURES

- A solid core timber door with firearm resistant plates within the construction.
- A Masonite finish is provided as standard which enables it to be painted in any colour, on site, to fit into the individual environments. Alternative finishes are available on request.
- Doors are available with or without a vision panel. The vision panel is made of clear vision glass which has the same attack resistance as the door.
- The door is SABS certified ballistic tested to weapons ranging from 9mm handguns to AK47 rifles (G1 - G3). (FB2 - FB6 EN1522 equivalent).
- Bespoke sizes are available including single as well as double leaf. The door comes pre-fitted in a ballistic tested frame. The frame is pre-drilled for fast, hassle-free installation in a fully finished wall opening.
- Doors are fitted with one Euro profile mortice deadlock providing an exceptional degree of protection as standard. A number of other locking options are available including emergency exit push bars. The leading edge of the door is fitted with a metal T bar section to offer protection against physical attacks with levers.
- Customer specified options including door closers, magnetic locks, interlocking and other customer specified locks, handles and stainless kickplates are available.
