

# Gunnebo ARMOUR Plus

## Multi-purpose Steel Security Doors

The Gunnebo ARMOUR Plus range of security doors offers multiple levels of protection for external and back of house applications. Highly resistant security materials and tried and tested design all combine to protect against ballistic and manual attacks. Doors can be supplied with optional features to include additional blast and fire protection

- A powder coated finish to door and frame is provided as standard. Alternative finishes can be accommodated
- Doors are available with or without a vision panel. Vision panels are made to match the resistance level of the door
- The door is tested to meet SABS ballistic standards of G1-G3 (Equivalent FB2-FB7 EN 1522)
- Bespoke sizes are available including single as well as double leaf doors. The door comes pre-fitted in a matching ballistic frame. The frame is pre-drilled for fast, hassle free installation in a fully finished wall opening. Leading edge of door is fitted with a metal T bar to protect against attack with levers
- Doors are fitted with one Euro profile mortice deadlock

providing an exceptional degree of protection as standard. A number of other locking options are available, including emergency exit push bars. The doors are also designed to meet Equivalent RC 1-4 EN 1627 attack levels depending on door specification and locking solution chosen

- Customer Specified options like Door closers, magnetic locks, interlocking, customer specified locks, handles. Weather strip and stainless kick plates are available
- Threshold of door is flush fitting as standard but for higher attack and blast doors then additional threshold rebate is required
- Optional Fire resistant door infill to provide certified 2 hour fire resistance in addition to the standard security features
