# INTRODUCTION

Makoro Brick &Tile (PTY)LTD is a Clay Brick Manufacturing Company that was established at Makoro Village near Palapye, Botswana in1987. Since then the company has grown from strength to strength, keeping up with the latest in cutting edge technology and product design.

Makoro Brick & Tile produce BOBS Certified FBX, FBS and NFX clay bricks for both Local and Export Markets.

The Makoro Clay Brick range is a timeless reminder of the Flexibility and Cost Effectiveness of our Clay Face Bricks. With us you get very High Quality yet Competitively Priced products that are Sustainable, Cost effective, Maintenance Free and Environmentally Friendly.

## **Our Pride**

We are proud to be a Botswana company and currently employ over 200 Batswana people whom play a vital roll in our success and in return we help contribute to the national quest for job creation, which is the philosophy of the Botswana Government's SMME policy.

## **Quality Policy**

As a supplier, it is our policy to ensure that our products adhere to contractual specifications and satisfy the customer in terms of consistent Quality and Service delivery. We are committed to maintaining an effective and approved Quality Management System. We will comply with all statutory safety and environmental regulations and ensure a safe environment for our employees and customers.

## **Quality Guarantee**

Makoro Guarantees that all certified bricks supplied by Makoro, will adhere to the standard (BOS 28:2000) set by the Botswana Bureau of Standards in terms of their strength, density and uniformity of size and shape. All bricks supplied that do not adhere to the specification, will be replaced provided that it has not been built into the wall, unless proof of product failure in the wall can be confirmed.

# PRODUCT INSIGHTS

Makoro Bricks have always been at the cutting edge of new innovation and product development. The Makoro Clay Brick range is a timeless reminder of the flexibility and cost effectiveness of our Clay Face Bricks. With us you get very high quality yet competitively priced products that are sustainable, maintenance free and environmentally friendly.

## 1. **Cost Comparison:**

- a. The cost of building with Makoro Clay Bricks is less than with stock brick and plaster, as there is no cost of plastering, painting or maintenance.

## 2. **Value:**

- a. Building with Makoro Face Brick will add value to your building. The quality of the bricks used is visible and not hidden behind plaster and paint.

## 3. **Product Selection:**

- a. Get it right the first time! Bricks cannot be replaced after they have been used, so make sure when it comes to bricks, you *Always Buy the Best!*

## 4. **Maintenance:**

- a. Makoro Face Brick require no maintenance. No more expense on repainting. Makoro Clay Bricks do not expand, shrink or crack like other products. This further reduces maintenance and saves money.

## 5. **Environmental Benefits:**

- a. Better thermal properties reduces electricity consumption
- b. Made from environmentally friendly material which is clay and water
- c. Clay Brick buildings have a lifecycle of over 500 years putting less strain on our natural resources to replace it.
