

MAKORO --- GROUP

PRODUCT BOOKLET

MAKORO GROUP

Established over 40 years ago, Makoro Group has grown into a powerhouse of diverse industries in Botswana. From pioneering Makoro Brick, a leader in high-quality clay bricks, to Makoro Tank, specializing in durable water storage solutions, the group continues to expand its impact. Makoro Logistics ensures seamless transport and distribution, while Kwadiwa Ranch and Kwadiwa Citrus contribute to Botswana's agricultural and tourism sectors. PolyTech leads in advanced plastic molding, and RS Motorsport Botswana fuels the passion for motorsports.

With seven dynamic companies under its wing, Makoro Group remains committed to innovation, sustainability, and excellence, driving Botswana's industries forward.

PROUDLY MANUFACTURED IN BOTSWANA

For over 40 years, Makoro has been proudly manufacturing high-quality products right here in Botswana! From Makoro Brick to Makoro Tank, we have built a legacy of durability, reliability, and innovation.

Our products are designed to meet the needs of Botswana, ensuring top-tier quality for homes, businesses, and farms.

MAKORO BRICKS

Makoro Brick & Tile is a leading manufacturer of high-quality clay bricks in Botswana, established over 40 years ago. Founded with a vision to provide durable, eco-friendly, and fire-resistant building materials, Makoro Brick has grown to become a trusted name in the construction industry.

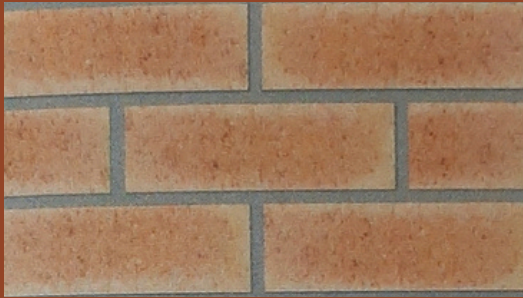

Using 100% natural clay, our bricks are built to withstand harsh weather conditions and last for over 100 years. Committed to sustainability, innovation, and excellence, Makoro Brick continues to shape Botswana's infrastructure, one brick at a time.

DESIGN IT WITH MAKORO BRICK

FBX – Face Brick Extra

This is basically bricks selected according to their uniformity in colour, usually the colour shading of the bricks is almost 100% consistent, it can be categorized as first grade selection as it is the primary need/ demand product by Makoro.

FBS – Face Brick Standard

This is a bi-grade of FBX in terms of colour. The bricks are graded considering that their colour is not 100% consistent as compared to FBX. The size and strength are all the same but differentiated by colour consistency. Maybe called 2nd grade colour. It does not come in large quantities as it is not the primary product Makoro wants to produce.

NFX – Non Face Extra

This is a brick to be used as non-Face brick, called Clay Stock Brick, due to its colour. It is usually used for foundations or inner walls to pair with outside face brick and to be plastered.

WHY US?

Cost Comparison:

The cost of building with Makoro Clay Bricks is less than with stock brick and plaster, as there is no cost of plastering, painting or maintenance.

Value:

Building with Makoro Face Brick will add value to your building. The quality of the bricks used is visible and not hidden behind plaster and paint.

Product Selection:

Get it right the first time! Bricks cannot be replaced after they have been used, so make sure when it comes to bricks, you Always Buy the Best!

Maintenance:

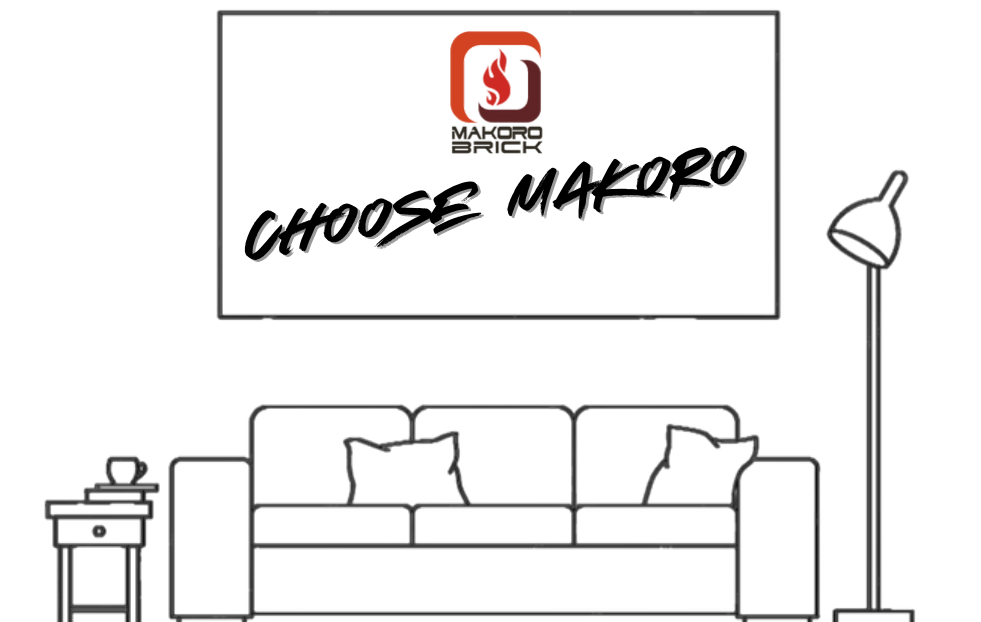

Makoro Face Brick require no maintenance. No more expense on repainting. Makoro Clay Bricks do not expand, shrink or crack like other products. This further reduces maintenance and saves money.

Environmental Benefits:

Better thermal properties reduces electricity consumption

Made from environmentally friendly material which is clay and water

Clay Brick buildings have a lifecycle of over 500 years putting less strain on our natural resources to replace it.

ABOUT MAKORO TANK

Makoro Tank Technologies is a Botswana based manufacturer of Roto-molded products. All our products are made with high quality materials using the latest roto molding technologies and machinery assuring you of the highest quality manufacturing standards from start to finish.

We take pride in our products and care about our customers, that is why we use the Eco Friendly 100% virgin material that has UV8 to manufacture our products, no recycled material is used in any of our products.

Each tank and product goes through very strict quality controls before it leaves the premises. Makoro Tanks would like the end-user to have the knowledge that they are buying a superior product designed for the harsh Southern African weather and environmental conditions.

Thank you for your interest in the range of Makoro Water Tank Solutions.

BUILT STRONG. LASTS LONG

The 15000L is one of our latest product and biggest tank that we manufacture here at Makoro Tank Technologies.

The “Big Kahuna” as we call it, is a tank that can act as a reservoir and can be used to store your bulk liquids. You can buy 6 X 15000L tanks and you have yourselves a 90000L RESEVOIR that is COST EFFECTIVE, DOESN'T RUST, LOW MAINTENACE AND LONG LASTING.

As compared to a steel reservoir the tanks are closed and therefore there is no chances of loss of water due to evaporation. The tanks also can be inter-connected so there is very minimal stoppages in stored water usages should there be a damage on one of the tanks then the others can continue the work while one is being repaired.

We assure you that “The Big Kahuna” will definitely give you value for your money.
