NATURAL BEAUTY **EVOLUTIONARY PERFORMANCE**

WELCOME

NEWTECHWOOD'S ULTRASHIELD® IT'S LIKE WOOD, WITHOUT THE WORRY

NewTechWood's UltraShield® uses recycled wood and plastics to create a fully customisable improvement on traditional timber building products. NewTechWood delivers the natural look of wood without the on-going maintenance and expense.

Part of the beauty of hardwood comes from the subtle mix of colour tones and hues; no single board is exactly alike. NewTechWood looks like wood, and feels like wood, but it's durable, environmentally friendly, and you won't spend hours staining and sealing your deck or cladding.

WHY UltraShield®?

THE KEY TO LONG TERM PERFORMANCE IS PROTECTING THE CORE

Wood is the root of all problems. As we see in first generation “uncapped” composite decking, the wood content of the board is exposed and susceptible to bleaching from the sun, decay from the wet and consumption from mould. Tannins in the wood particles are exposed, resulting in staining of the deck.

NewTechWood's UltraShield® capping encases all four sides of the board to give absolute protection from weather, sun, scuffs, and scrapes. The UltraShield® cap is fusion-bonded to the core of the board, creating an impermeable seal so your deck looks good for decades to come.

Using our proprietary process called Naturele, NewTechWood delivers the most realistic textures with exciting, multi-chromatic finishes and a product that is highly durable, long-lasting, and resistant to staining, fading and relative impact. All of our products are co-extruded with our UltraShield® cap and carry the same world leading 25 year fade, stain and performance warranty.

DECKING

ULTRASHIELD® DECKING RUGGED ELEGANCE FROM NEWTECHWOOD

From subtle hues to eye-catching accents, UltraShield's® Naturale collection of colours and surface patterns delivers a palette of design options to create a customised look and feel that's perfect for you.

All UltraShield® decking is wrapped 360 degrees – including the grooves – for even greater durability! Available in solid profiles for both residential and commercial applications. UltraShield® from NewTechWood delivers an attractive look and durability to handle even the heaviest traffic.

CLADDING

NEWTECHWOOD ULTRASHIELD® CLADDING STYLISH CLADDING THAT LASTS

Why settle for aluminum or wood cladding that looks fake, when you can have the same ease of installation, low maintenance, and durability that stands up to any weather conditions? Our cladding looks and feels like natural wood, without the worry of wood exposed to the elements.

NewTechWood cladding installs quickly using our exclusive clip system that creates a beautiful, seamless finish. Our installation system enables your home to “breathe” as air circulates between cladding and joists, keeping your home dry and energy efficient.

DECORATIVE BEAM PROFILES

ULTRASHIELD® DECORATIVE BEAMS SO SIMPLE; SO BEAUTIFUL

NewTechWood's UltraShield® beam profiles are a family of innovative products that look like natural timber but require no maintenance. Designed to handle the harshest African conditions, our composite screening is the perfect solution for creating stylish pergolas and screens in your home or commercial alfresco areas.

Our composite timber-look beams provide a more natural and fade resistant alternative to aluminum and timber slats, that add a modern feature to any architectural façade or pergola. Installs vertically or horizontally with variable gaps. There are a multitude of different ways that you can install these beams to enhance your outdoor living space.
