PRIMERS

RANGE

- 1/ DampPrime
- 2/ EpoxiPrime
- 3/ GTP Glazed Tile Primer
- 4/ PlasterPrime Premium
- 5/ PlasterPrime
- 6/ UniSub
- 7/ SealerMix
- 8/ Cementek

1 DAMPPRIME Damp Proofing / Primer

Due to DampPrime's excellent adhesion, rising damp is held back in the surface. DampPrime's formulation contains cement which, with the moisture in the wall and other special ingredients, causes the product to harden to a water-tight barrier.

2 EPOXIPRIME Multi-Surface Primer

EpoxiPrime has been specially formulated to achieve adhesion of subsequent coats to difficult surfaces like glass, tiles, pools and ponds etc. The latest resin technology has been utilised in EpoxiPrime to produce a product with low environmental impact and a primer capable of forming an osmotic barrier for floor, pool and pond coatings or where required.

PRIMERS

3 GLAZED TILE PRIMER (GTP) Tile Primer

Glazed Tile Primer has been specially formulated as a primer for glazed ceramic tiles. It allows you to paint over bathroom and kitchen tiles, saving you the cost of retiling.

4 PLASTERPRIME Solvent Based

A fine particle size, solvent base Styrene Acrylic with excellent alkali resistance, water-resistance, and adhesion. It is white in color and has been formulated as a primer for Gypsum plaster (RhinoLite) or cement plaster. It can be applied to new plaster after Paintcor's damp proofing has been carried out, or on all new good quality plaster, especially in coastal weather conditions.

5 PLASTERPRIME PREMIUM Water-Borne Plaster Primer (Clean pine odour)

A fine particle size, water-borne acrylic with excellent alkali resistance, water resistance, and adhesion. It is off-white in color and has been formulated as a primer for Gypsum plaster (RhinoLite) or cement plaster. It can be applied to new plaster after Paintcor's damp proofing has been carried out, or on all new good quality plaster especially in coastal weather conditions.

6 UNISUB Universal Undercoat / Primer

UniSub is an Alkyd-based universal undercoat formulated to quality specifications. It is to be used to undercoat surfaces before the application of enamel and other top-coats.

7 SEALERMIX Undercoat/Sealer

Sealermix is a pigmented, alkali-resistant plaster-sealer specially designed for scratch plaster but can be used on any new plaster.

8 CEMENTEK Cement enhancer / Primer / Sealer

Cementek is a clear, low viscosity, pure acrylic solvent based formulation that cures, seals and dust proofs new "green" concrete and old concrete. It protects against UV rays and has a semi-gloss finish. Cementek is used for application to all types of concrete and plaster including concrete flooring and cement screeds, both old and new.

UNDERCOATS

RANGE

- 1/ AcrylUnder
- 2/ Subtex
- 3/ UniSub - universal undercoat
- 4/ SealerMix
- 5/ Universal Undercoat Trade

WWW.PAINTCOR.CO.ZA

1 ACRYLUNDER Filler Coat

Acrylunder Acrylic Undercoat is specifically formulated as a quality first coat for new cement plaster. Acrylunder has excellent adhesion and filling properties with no added lead and low VOC.

2 SUBTEX Textured Undercoat

Formulated to correct texture differences on new one-coat cement plaster. It has been designed to be cost-effective, alkaline resistant, and can be applied with either a sheepskin roller to correct texture difference or with a ripple roller to give a smooth low-relief ripple. Subtex will cover plaster in one coat when used with a sponged ripple roller. After the application of Subtex, the top coats of your choice can be applied.

UNDERCOATS

3 UNISUB Primer/Undercoat

UniSub is an Alkyd based universal undercoat formulated to quality specifications. It is to be used to undercoat surfaces before the application of enamel and other top-coats.

4 SEALERMIX Undercoat/Sealer

Sealermix is a pigmented, alkali resistant plaster-sealer specially designed for scratch plaster but can be used on any new plaster.

5 UNIVERSAL UNDERCOAT TRADE Primer/Undercoat

Universal Undercoat Trade is an Alkyd-based universal undercoat formulated to quality specifications. It is to be used to undercoat surfaces before the application of enamel and other top-coats.

TOP COATS

RANGE

- 1/ Elegance Matt
- 2/ Elegance Silk
- 3/ Essence
- 4/ Pristina
- 5/ EnduraCoat
- 6/ EnviroCoat
- 7/ Econocryl

WWW.PAINTCOR.CO.ZA

1

ELEGANCE MATT

Low sheen high-performance multi-surface coating

Elegance Matt is a high-quality, enviro-friendly exterior wall coating, designed and formulated (to Grade 1 specifications) using quality raw materials to combat South Africa's extreme climatic conditions. It is also user-friendly (almost zero spatters, low odor, and easy to apply). Elegance Matt has an elegant, low sheen finish.

2

ELEGANCE SILK

Sheen high performance multi-surface coating

Elegance Silk is a high-quality, environmentally friendly exterior wall coating, designed and formulated (to Grade 1 specifications) using quality raw materials to combat South Africa's extreme climatic conditions. It is also user-friendly (almost zero spatters, low odor, and easy to apply). Elegance Silk has an elegant, silk finish.

3

ESSENCE

Mid-Sheen Wall Coating

Essence has been designed using the latest dispersion technology to achieve a low VOC (enviro-friendly), mild sheen interior, and exterior product based on a pure acrylic. Using V-spere technology, we are able to produce a high-quality product at reasonable pricing, achieving value for money not easily equaled.

TOP COATS

4 PRISTINA Matt Wall Coating

Pristina Pure Acrylic is a quality emulsion paint suitable for interior and exterior use. Pristina has been formulated to the highest PVA specifications, is based on a pure acrylic and has a smooth matt finish.

5 ENDURACOAT Durable multi-surface coating

Enduracoat is an ultra-tough, top-quality, non-drip polyurethane enamel used to protect and decorate walls, doors, cupboards, window frames, wood, etc. Enduracoat is recommended for interior surfaces.

6 ENVIROCOAT Premium all-surface coating

A super tough, non-yellowing pure acrylic water-based enamel substitute. Formulated to give a medium gloss finish with excellent adhesion and great self-leveling properties. Used on interior and exterior wood, masonry, mild steel, glass, previously enameled surfaces, kitchens, bathrooms etc. Ideal top coat for use over Paintcor Glazed Tile Primer and over EpoxiPrime for shower tiles.

7 ECONOCRYL Contractors Matt Wall & Ceiling Paint

Econocryl is a Matt Acrylic that allows for both hiding power and cost-effective maintenance. It is perfect for painting of ceilings as well as internal walls and can also be used effectively as an undercoat on well bound, cement plaster. Econocryl can be tinted to most Pastel colours.

TEXTURED COATINGS

RANGE

- 1/ Grantex
- 2/ Satintex
- 3/ RippleTex
- 4/ SubTex

1

GRANTEX Granular Textured Coating

Formulated using specialised raw materials to achieve a tough coating with a rough granular texture finish. Designed to cover plaster imperfections, with excellent adhesion, water and alkali resistance. Grantex can be used as a first coat on good quality plaster and can be tinted in a variety of colours. It is recommended that Grantex be over coated with a final coat.

2

SATINTEX Smooth Textured Coating

Formulated using specialised raw materials to achieve a tough coating with a smooth textured finish. Satintex has been designed to cover plaster imperfections, with excellent adhesion, flexibility, water and alkali resistance. Satintex can be used as a first coat on good quality plaster and can be tinted in a variety of colours.

TEXTURED COATINGS

3

RIPPLETEX Textured Wall Coating

RippleTex has been formulated using specialised raw materials to achieve a tough durable, flexible coating with smooth rounded peaks and low dirt retention. RippleTex has been designed to cover plaster imperfections, with excellent flexibility, adhesion, water and UV resistance (see SABS Test Report). Texture finish determined by roller.

4

SUBTEX Textured Undercoat

SubTex has been specially formulated to correct texture differences on cement plaster. It has been designed to be cost-effective, alkaline resistant, and can be applied with either a sheepskin roller to correct texture difference or with a ripple roller to give a smooth low-relief ripple. SubTex will cover plaster in one coat when used with a sponged ripple roller. After the application of Subtex, top coats of your choice can be applied.

ROOF PAINT

RANGE

- 1/ RuvAcryl
- 2/ Elegance Silk
- 3/ Elegance Matt
- 4/ EnviroCoat

1

RUVACRYL High-performance Roof Coating

Ruvacryl Premium has been designed to withstand South-African climate conditions by using the latest weather barrier technology for application to all roofing types. This roof paint will maintain its colour and protect your roof against UV, acid rain, mould and algae for over 10 years. Ruvacryl can be used on many different surfaces such as old enamel, glass and certain plastics. Ruvacryl conforms to EU 2010 VOC rules and contains no added lead.

2

ELEGANCE SILK Sheen high-performance multi-surface coating

Elegance Silk is a high-quality, enviro-friendly exterior wall coating, designed and formulated (to Grade 1 specifications) using quality raw materials to combat South Africa's extreme climatic conditions. It is also user-friendly (almost zero spatters, low odor, and easy to apply). Elegance Silk has an elegant, silk finish.

ROOF PAINT

RANGE

- 1/ RuvAcryl
- 2/ Elegance Silk
- 3/ Elegance Matt
- 4/ EnviroCoat

3

ELEGANCE MATT

Low sheen high-performance multi-surface coating

Elegance Matt is a high-quality, enviro-friendly exterior wall coating, designed and formulated (to Grade 1 specifications) using quality raw materials to combat South Africa's extreme climatic conditions. It is also user-friendly (almost zero spatters, low odor, and easy to apply). Elegance Matt has an elegant, matt finish.

4

ENVIROCOAT

Premium all-surface coating

EnviroCoat is a super tough, non-yellowing, self-cross-linking pure acrylic. It is designed as a waterbased enamel substitute, giving an environmentally friendly option for trim paint. It has been formulated to give a medium gloss finish with excellent adhesion and good self-levelling properties. This product can be used on interior and exterior wood, masonry, mild steel, previously enamelled surfaces after sanding, kitchens and bathrooms etc. EnviroCoat is also the ideal top coat for use over Paintcor's Glazed Tile Primer.

CLEANING AGENTS

RANGE

- 1/ Grime Reaper
- 2/ Ushevu
- 3/ Hand Sanitizer

PAINTCOR.CO.ZA

1 GRIMEREAPER Degreaser/Cleaning Agent.

Abrasive degreasing agent used for cleaning new or old galvanized iron before painting. It is also used to clean handrails and other areas where fats or oils have accumulated before the surface area is painted. GrimeReaper contains an abrasive medium that will leave a clean, lightly sanded surface ready to be painted. It can also be used to clean old paintbrushes and can even remove acrylic paint from clothing.

2 USHEVU Fungal wash

Ushevu is an antibacterial surface sterilizer used for killing algae, mould, mildew, and other bio-contaminants before painting.

3 HAND SANITIZER Disinfectant Alcohol Based Hand Rub

- Antibacterial.
- Fungicidal.
- General disinfectant.
- 70% alcohol-based.
- Effective against a broad spectrum of viruses, bacteria & fungi - 70% alcohol content

WOOD PRODUCTS

RANGE

- 1/ WoodFirst
- 2/ WoodCoat
- 3/ WoodLusta Suede /Gloss
- 4/ WoodLuv
- 5/ GlazeCoat

WWW.PAINTCOR.CO.ZA

1 WOOD1ST Wood Oil Treatment / Wood Stain

Wood1st has been developed to protect and stain (if necessary) both new and raw wood. It can be used alone, or as a deep penetrating primer under varnish. Wood1st contains deep penetrating oils, alkyds, pesticides and UV stabilizers. It feeds, nourishes and protects all wood from various weather conditions and mould.

2 WOODCOAT Varnish

A ready-for-use exterior clear or stained wood varnish exhibiting good long-term flexibility and waterproofing properties. Its main use is for the treatment and protection of exterior wood surfaces. This product can only be used on new wood, wood with no varnish or paint on it or wood where the old varnish has been removed or well sanded.

3 WOODLUSTA SUEDE / GLOSS Interior Varnish

WoodLusta is an Alkyd Polyurethane wood varnish formulated for the protection of interior wood. It creates excellent hardness and flexibility.

WOOD PRODUCTS

4 WOODLUV High-performance Varnish

WoodLuv is ready to use as an exterior clear or stained wood varnish. It exhibits excellent long-term flexibility, toughness, UV and water resistance due to the careful selection of resins used in the product. It has been formulated to meet the highest quality standards. WoodLuv allows for rich nourishment and contains protection oils and stabilizers which help achieve a tough yet flexible clear film. This allows for the application to most outdoor wood surfaces such as floors, furniture, window frames and doors. This product can only be used on new wood, on wood with no paint, on wood which has been stripped of all existing varnish or the existing varnish has been well sanded.

5 ART-FX GLAZE COAT Waterbased Varnish

Water-based, adhesion-promoted varnish based on a pure acrylic polymer for over coating wall murals, paint techniques and decoupage as well as a varnish for wood.

1 ELEGANCE MATT Low sheen high-performance multi-surface coating

Elegance Matt is a high-quality, enviro-friendly exterior wall coating, designed and formulated (to Grade 1 specifications) using quality raw materials to combat South Africa's extreme climatic conditions. It is also user-friendly (almost zero spatters, low odor, and easy to apply). Elegance Matt has an elegant, matt finish.

2 ELEGANCE SILK Sheen high-performance multi-surface coating

Elegance Silk is a high-quality, environmentally friendly exterior wall coating, designed and formulated (to Grade 1 specifications) using quality raw materials to combat South Africa's extreme climatic conditions. It is also user-friendly (almost zero spatters, low odor, and easy to apply). Elegance Silk has an elegant, silk finish.

3 PRISTINA Matt Wall Coating

Pristina Acrylic PVA is a quality emulsion paint suitable for interior and exterior use. Pristina has been formulated to the highest PVA specifications, is based on pure acrylic, and has a smooth matt finish.

PAINT TECHNIQUES

RANGE

- 1/ Art FX Glaze Coat
- 2/ Art FX Scumble Glaze
- 3/ Pristina

WWW.PAINTCOR.CO.ZA

- 1** ART-FX GLAZE COAT
Paint Techniques / Wood Treatment / Decoupage Varnish / Chalk-It clear sealer

Water-based, adhesion-promoted varnish based on a pure acrylic polymer for over coating wall murals, paint techniques and decoupage as well as a varnish for wood.

- 2** ART-FX SCUMBLE GLAZE
Paint Techniques

ART-FX Scumble Glaze is a water-based, transparent non-yellowing acrylic medium for facilitating various different paint techniques.

- 3** PRISTINA
Durable multi-surface coating

Pristina Acrylic PVA is a quality emulsion paint suitable for interior and exterior use. Pristina has been formulated to the highest PVA specifications, is based on a pure acrylic and has a smooth matt finish.

TRIMMINGS

RANGE

- 1/ HiGlo
- 2/ LoGlo
- 3/ EnduraCoat
- 4/ EnviroCoat
- 5/ Elegance Silk

1 HiGLO Trim Paint / Wood paint / Wall coating

HiGlo enamel has been formulated to provide protection for wood, metal and other surfaces. It will dry to a high gloss finish.

2 LOGLO Trim Paint / Wood paint / Wall coating

LoGlo enamel has been formulated to provide protection for wood, metal and other surfaces. It will dry to an egg shell finish.

3 ENDURACOAT Durable multi-surface coating

Enduracoat is an ultra-tough, top-quality, non-drip polyurethane enamel used to protect and decorate walls, doors, cupboards, window frames, wood, etc. Enduracoat is recommended for interior use but can be used effectively outdoors.

TRIMMINGS

4

ENVIROCOAT

Wall Coating / Trim / Wood Paint

EnviroCoat is a super tough, non-yellowing pure acrylic water-based enamel substitute. It has been formulated to give a medium gloss finish with excellent adhesion (sticks to glass under water) and good self-levelling properties. This product can be used on interior and exterior wood, masonry, mild steel, glass, previously enamelled surfaces, kitchens, bathrooms etc. EnviroCoat is also the ideal top coat for use over Paintcor Glazed Tile Primer and over EpoxiPrime for shower tiles.

5

ELEGANCE SILK

Wall Coating / Trim / Wood Paint

Elegance Silk is a high-quality, enviro-friendly exterior wall coating, designed and formulated (to Grade 1 specifications) using quality raw materials to combat South Africa's extreme climatic conditions. It is also user-friendly (almost zero spatters, low odor, and easy to apply). Elegance Silk has an elegant, silk finish.

STEEL PRIMERS & RUST CONVERTER

RANGE

- 1/ All Prime Plus
- 2/ Ruscon
- 3/ EnviroPrime

WWW.PAINTCOR.CO.ZA

1

ALLPRIME PLUS Multi-Surface Primer

AllPrime Plus is a solvent-based, single pack, acid etch primer. It is black in colour and used for priming a variety of surfaces such as mild steel, galvanized iron, and composite material. Allprime Plus is suitable for coastal use.

2

RUSCON Rust Converter

Ruscon is a water-based red rust converter.

3

ENVIROPRIME Steel Primer

EnviroPrime is a water-based, nontoxic anti-corrosive, Red Oxide in colour paint used for priming mild steel and galvanised iron.

SKIMMING & PATCHING

RANGE

- 1/ FlashSkim
- 2/ FlashPatch Exterior
- 3/ FlashPatch Interior
- 4/ AcryLatex

1 FLASHSKIM

Skimming compound

FlashSkim is a resin-bound plaster skimmer, designed for interior use. Proper application will result in a smooth white finish, optimising the application of topcoats.

2 FLASHPATCH EXTERIOR

Ready mix Patching and Skimming Compound

FlashPatch is a flexible waterproof resin-bound crack filler for exterior use.

3 FLASHPATCH INTERIOR

Ready mix Patching and Skimming Compound

FlashPatch Interior is a resin-bound crack-filler, designed for interior use. Proper application will result in a smooth white finish, optimising the application of top coats.

4 ACRYLATEX

Cement Enhancer / Waterproofing and Damp Proofing / Patching compound.

AcryLatex is a modified Acrylic latex product, specially formulated for incorporation into cement compounds. It is used to wet sand and cement mixtures instead of water for waterproofing, damp proofing, improving flexibility, adhesion and the durability of plaster.

AcryLatex can also be used to repair large areas of damaged cementitious surfaces, e.g. repairing floor screeds and walls. As well as areas where very thin plaster films are required (feather- edging). AcryLatex can be used in the repair or construction of fishponds and in plaster below damp proof course (stops rising damp in plaster) and suitable for use in flower boxes, on bridges and buildings.

WWW.PAINTCOR.CO.ZA

CEMENT ENHANCERS

RANGE

- 1/ AcryLatex
- 2/ CemenTek
- 3/ PlasterBond

1

ACRYLATEX

Cement Enhancer / Waterproofing and Damp Proofing / Patching Compound.

AcryLatex is a modified Acrylic latex product, specially formulated for incorporation into cement compounds. It is used to wet sand and cement mixtures instead of water for waterproofing, damp proofing, and improving flexibility, adhesion, and the durability of plaster.

AcryLatex can also be used to repair large areas of damaged cementitious surfaces, e.g. repairing floor screeds and walls. As well as areas where very thin plaster films are required (feather-edging). AcryLatex can be used in the repair or construction of fishponds and in plaster below damp proof course (stops rising damp in plaster) and is suitable for use in flower boxes, on bridges, and buildings.

2

CEMENTEK

Cement enhancer / Primer / Sealer

Cementek is a clear, low viscosity, pure acrylic solvent based formulation that cures, seals and dust proofs new "green" concrete and old concrete. It protects against UV rays and has a semi-gloss finish. Cementek is used for application to all types of concrete and plaster including concrete flooring and cement screeds, both old and new.

3

PLASTERBOND

Primer / Cement Enhancer

PlasterBond is a specially formulated latex which has been developed to promote the adhesion between new plaster and the surface to which the plaster is being applied.

DAMP- PROOFING

WWW.PAINTCOR.CO.ZA

RANGE

- 1/ AcryLatex
- 2/ DampPrime
- 3/ KlinkaSeal
- 4/ Cementek

1

ACRYLATEX

Cement Enhancer / Waterproofing and Damp Proofing / Patching compound..

AcryLatex is a modified Acrylic latex product, specially formulated for incorporation into cement compounds. It is used to wet sand and cement mixtures instead of water for waterproofing, damp proofing, and improving flexibility, adhesion, and the durability of plaster.

AcryLatex can also be used to repair large areas of damaged cementitious surfaces, e.g. repairing floor screeds and walls. As well as areas where very thin plaster films are required (feather-edging). AcryLatex can be used in the repair or construction of fishponds and in plaster below damp proof course (stops rising damp in plaster) and is suitable for use in flower boxes, on bridges, and buildings.

2

DAMP PRIME

Damp Proofing / Primer

Due to DampPrime's excellent adhesion, rising damp is held back in the surface, (cannot penetrate the primer). DampPrime's formulation contains cement which, with the moisture in the wall and other special ingredients, causes the product to harden to a water tight barrier.

DAMP- PROOFING

RANGE

- 1/ AcryLatex
- 2/ DampPrime
- 3/ KlinkaSeal
- 4/ Cementek

WWW.PAINTCOR.CO.ZA

3

KLINKASEAL
Waterproofing / Damp proofing.

Klinkaseal water-repellent sealer is a liquid silicone carried by a solvent. It is designed to seal face-brick surfaces, to inject as a chemical damp proof course and to protect plaster against rising damp. The product has been developed to penetrate porous masonry surfaces and to react with the structure prohibiting moisture absorption. Due to the high alkalinity of most brick and cement surfaces, Klinkaseal has been formulated to be highly resistant to alkalinity using the Iso-Octyl Siloxane-type technology.

4

CEMENTEK
Cement enhancer / Primer / Sealer

Cementek is a clear, low viscosity, pure acrylic solvent based formulation that cures, seals and dust proofs new "green" concrete and old concrete. It protects against UV rays and has a semi-gloss finish. Cementek is used for application to all types of concrete and plaster including concrete flooring and cement screeds, both old and new.

WATER PROOFING

RANGE

- 1/ AcryLatex
- 2/ AquaSeal
- 3/ AquaMatt
- 4/ KlinkaSeal

WWW.PAINTCOR.CO.ZA

1

ACRYLATEX

Cement Enhancer / Waterproofing and Damp Proofing / Patching compound.

AcryLatex is a modified Acrylic latex product, specially formulated for incorporation into cement compounds. It is used to wet sand and cement mixtures instead of water for waterproofing, damp proofing, improving flexibility, adhesion and the durability of plaster.

AcryLatex can also be used to repair large areas of damaged cementitious surfaces, e.g. repairing floor screeds and walls. As well as areas where very thin plaster films are required (feather-edging). AcryLatex can be used in the repair or construction of fishponds and in plaster below damp proof course (stops rising damp in plaster) and suitable for use in flower boxes, flat deck roofs (2k system), on bridges and buildings.

2

AQUASEAL SATURATOR AND TOP COAT

Waterproofing / Wall Coating

AquaSeal is an acrylic waterproofing system to be used in conjunction with a non-woven Geo-Fabric membrane. The system has been designed to provide a highly elastic, durable, and attractive system that can be used on varying substrates.

WATER PROOFING

3 AQUAMATT Fibre Re-enforced Waterproofing Compound.

AquaMatt is a water-based, fibre re-enforced, acrylic copolymer coating used for waterproofing of masonry decks (flat roofs), parapet walls, roof bolt patches and any other horizontal surface where water may collect. AquaMatt is seamless and does not require the use of a membrane onto surfaces to which it is applied. AquaMatt may also be used to re-enforce plastered corners such as window and doorway reveals, as well as over plaster repairs prior to painting.

4 KLINKASEAL Waterproofing/Damp proofing.

Klinkaseal water-repellent sealer is a liquid silicone carried by a solvent. It is designed to seal face-brick surfaces, to inject as a chemical damp proof course and to protect plaster against rising damp. The product has been developed to penetrate porous masonry surfaces and to react with the structure prohibiting moisture absorption. Due to the high alkalinity of most brick and cement surfaces, Klinkaseal has been formulated to be highly resistant to alkalinity using the Iso-Octyl Siloxane-type technology.

SEALERS

RANGE

- 1/ AcrySeal
- 2/ CemenTek
- 3/ KlinkaSeal
- 4/ RhinoSeal
- 5/ StoneSeal

1 ACRYSEAL Surface Stabilizer

Water-based styrene acrylic co-polymer for sealing various under-ground substrates with excellent binding power and water resistance.

2 CEMENTEK Cement enhancer / Primer / Sealer

Cementek is a clear, low viscosity, pure acrylic solvent based formulation that cures, seals and dust proofs new "green" concrete and old concrete. It protects against UV rays and has a semi-gloss finish. Cementek is used for application to all types of concrete and plaster including concrete flooring and cement screeds, both old and new.

3 KLINKASEAL Waterproofing / Damp proofing.

Klinkaseal water-repellent sealer is a liquid silicone carried by a solvent. It is designed to seal face-brick surfaces, to inject as a chemical damp proof course and to protect plaster against rising damp. The product has been developed to penetrate porous masonry surfaces and to react with the structure prohibiting moisture absorption. Due to the high alkalinity of most brick and cement surfaces, Klinkaseal has been formulated to be highly resistant to alkalinity using the Iso-Octyl Siloxane-type technology.

SEALERS

4 RHINOSEAL Primer / Sealer / Bonding Liquid

Rhino Seal is a fine particle size water borne acrylic bonding liquid, specifically designed to penetrate deeply into hard wall surfaces. It is therefore ideally suited for priming gypsum plaster finishes, old chalking paint, new precast concrete or any absorbent new surface before painting. RhinoSeal has excellent alkali and efflorescence resistance and has been tested to penetrate $\pm 120\mu\text{m}$ into chalking material in one coat with complete binding of the loose friable material to the underlying surface on drying.

5 STONESEAL Brick & Stone Sealer

StoneSeal is a specially formulated brick and stone sealer with excellent adhesion, UV protection and water resistance. It has been designed to penetrate deep into the applied surface, enhancing the rich natural colour of the brick or stone whilst protecting and sealing it.

POOLS, PONDS & FLOORS

RANGE

- 1/ PoolCure
- 2/ FloorCoat
- 3/ TerraFirma
- 4/ AquaMatt
- 5/ AcrySeal
- 6/ AcryLatex

WWW.PAINTCOR.CO.ZA

1

POOLCURE

Epoxy Top Coat: Pools and Floors

Poolcure Epoxy Top Coat has been designed using the latest resin technology to improve UV resistance, hardness and water resistance. Poolcure has excellent adhesion and chemical resistance and must be used in conjunction with Paintcor's EpoxiPrime for floors and swimming pools. Poolcure is a Twin Pack system.

2

FLOORCOAT

Floor Coating

FloorCoat Alkyd Polyurethane Floor Paint has been formulated for domestic and light industrial concrete floors. It dries to a tough durable finish with excellent adhesion. Paintcor's FloorCoat is not recommended for exterior use. It is supplied in a range of standard colours and has a medium gloss finish.

3

TERRAFIRMA

Waterbased Floor Paint

TerraFirma driveway and paving paint is a hard, durable coating formulated to be fast drying, non-slip and very resistant to the sun. It can be used on porous brick and paving and comes in a range of tinted colours. TerraFirma will adhere to most surfaces, including some plastics.

POOLS, PONDS & FLOORS

WWW.PAINTCOR.CO.ZA

4 AQUAMATT Fibre Re-enforced Waterproofing Compound.

AquaMatt is a water-based, fibre re-enforced, acrylic copolymer coating used for waterproofing of masonry decks (flat roofs), parapet walls, roof bolt patches and any other horizontal surface where water may collect. AquaMatt is seamless and does not require the use of a membrane onto surfaces to which it is applied. AquaMatt may also be used to re-enforce plastered corners such as window and doorway reveals, as well as over plaster repairs prior to painting.

5 ACRYSEAL Surface Stabilizer

Water-based styrene acrylic co-polymer for sealing masonry substrates (Cement plaster) with excellent binding power and water resistance.

POOLS, PONDS & FLOORS

6

ACRYLATEX

Cement Enhancer / Waterproofing and Damp Proofing / Patching compound.

AcryLatex is a modified Acrylic latex product, specially formulated for incorporation into cement compounds. It is used to wet sand and cement mixtures instead of water for waterproofing, damp proofing, improving flexibility, adhesion and the durability of plaster.

AcryLatex can also be used to repair large areas of damaged cementitious surfaces, e.g. repairing floor screeds and walls. As well as areas where very thin plaster films are required (feather-edging). AcryLatex can be used in the repair or construction of fishponds and in plaster below damp proof course (stops rising damp in plaster) and suitable for use in flower boxes, flat deck roofs (2k system), on bridges and buildings.

AVIATION

1

TRI-3

Waterproofing / UV Protection.

TRI-3 is a water-based light pink saturator coat, based on a modified pure acrylic. TRI-3 has been specially formulated to completely seal and protect new fabric on fabric covered Aircraft from the elements. TRI-3 has an elongation of over 200 percent allowing it to stretch with your aircraft fabric with no cracking. It is recommended that top coats applied must also be flexible.
