

EASY-SIT

The Rodlin Design Easy- Sit is a compact and durable stadium seating solution, designed as a one-piece molded seat with an integrated mini backrest for ergonomic support. This seat provides efficient space utilization while ensuring spectator comfort, it is lightweight yet robust, making it ideal for large-scale installations.

Constructed from injection-molded polypropylene, the seat features a double-wall shell reinforced with structural ribs for enhanced strength and durability. The material composition includes 87% virgin-grade polypropylene and 13% masterbatch pigment with UV stabilizers and optional fire retardant properties with maximum light fastness rating of 8 on a scale of 1 to 8, ensuring resistance to fading. The seat is designed for long-term outdoor use, with a UV resistance rating of 180 KLy over five years. Available in a range of RAL colors, a minimum order of 500 units per color is required.

The Easy-Sit is designed for direct installation onto concrete steps or a steel beam, providing flexibility in stadium configurations. For enhanced durability in outdoor environments, an optional hot-dip galvanized steel frame is available. This frame is constructed from 50mm x 50mm square tubing and is installed into concrete using four galvanized M10 x 75mm anchor bolts per beam, ensuring a secure and stable seating solution.
