

ECCO STADIUM

The Rodlin Design Ecco stadium seat is a one-piece, injection-moulded polypropylene seat with an integrated backrest, designed to meet FIFA regulations. The Ecco provides a comfortable and durable seating solution for stadium environments.

Manufactured from virgin-grade polypropylene with UV stabiliser and optional fire-retardant additives, the Ecco seat is built for longevity in outdoor conditions. With a matt finish, it is available in a range of RAL colours, with a minimum order of 500 per colour.

The seat is designed for direct installation onto a concrete step or on galvanised steel beams, with the option of seat numbering fixed to the backrest. This frame is constructed from 50mm x 50mm square tubing and is installed into concrete using four galvanised M10 x 75mm anchor bolts per beam.

Warranty - 2 Years

DIMENSIONS:

- Width - 450mm
- Depth - 480mm
- Height - 380mm
