

GROENKLOOF

The Rodlin Design Groenkloof bench seating system is a continuous saligna bench seating solution available in various configurations and lengths. Designed for comfort, the bench seat and backrest are ergonomically shaped, with a concave profile.

Constructed from laminated saligna wood, with optional front-row modesty panels. All saligna surfaces are finished with a durable clear matt coating for a refined appearance.

The bench and table legs are made from 91 x 61 x 2.5mm oval steel tubing, providing strength and stability. Tabletop legs feature a 6 x 80 x 250mm mounting plate, while front mounting plates measure 6 x 80 x 150mm. The floor mounting plate is 2.5mm blanked and pressed, ensuring a secure installation.

The steel framework is epoxy powder-coated for durability and corrosion resistance. The minimum back-to-back spacing is 950mm, allowing for comfortable movement and accessibility.

This robust and stylish bench seating system is ideal for educational institutions, auditoriums, and public seating areas, offering a durable, ergonomic, and aesthetically pleasing solution for high-traffic environments.

Warranty - 5 Years

DIMENSIONS:

- Seat & Back Width - 400mm
- Writing Surface - 350mm x 30mm
