

KEMBO D-SWING

The Rodlin Design Kembo D-Swing seating system features a floor-mounted, double swing arm mechanism, designed for durability and seamless operation. The chair consists of a one-piece shell offering ergonomic support and comfort. This seating solution maximizes space efficiency in lecture halls, auditoriums, and conference rooms.

The chair structure is supported by a double swing arm mechanism, finished with a durable epoxy powder coating for enhanced longevity and resistance to wear. The seating system incorporates a custom continuous writing surface, made to your specification.

The chair is available in multiple upholstery options including un-upholstered, fully upholstered and upholstered seat only, offering high durability and comfort for extended use in high-traffic environments.

Warranty - 5 Years

DIMENSIONS:

- Back-to-Back - Dimensions are dependent on the writing surface widths
- Centre-to-Centre - Min 650mm
