

RD8500

The Rodlin Design RD-8500 is a versatile and functional two- or three-seater bench system designed for modern lecture halls, multi-media facilities, conference halls, and auditoriums. Featuring an integrated writing surface, it offers an elegant, space-efficient solution that prioritizes both function and comfort.

The bench system is constructed with a non-scratch, thermosetting epoxy-coated metal structure available in a black or grey matt metallic finish. The frame structure consists of a pressed sheet metal foot (3mm thickness), oval tubular uprights (90x30x2mm), and a rectangular tubular upright connection bar (80x40x3mm) for enhanced stability.

Seat support is made drawn sheet metal, 2mm thick, providing a stable base for seating with a backrest structure made from Ø25mm tubing, 2mm thick, ensuring strength and durability. The seat is fixed with concealed metal studs and features a spring-loaded tip-up mechanism with automatic return, ensuring smooth operation and a tidy seating arrangement.

A customisable writing surface is available, tailored to your specifications, with optional modesty panels for added functionality.
