

VERSA PU

The Rodlin Design Versa PU waiting area seating system is a robust and comfortable public seating solution, featuring fully moulded self-skinning polyurethane seats and backrests for enhanced durability and user comfort. RAL colour range available. The seats are mounted onto a mild steel framework that is epoxy powder-coated. Proudly 100% designed and manufactured in South Africa, the Versa PU system is engineered for high-traffic environments with a sleek, modern finish.

Available in 2, 3, or 4-seater configurations, the seating system includes a range of optional extras such as individual armrests, integrated magazine tables, and built-in charging units to suit various waiting area applications.
