

# WAVE

The Wave Auditorium Chair is a 100% South African manufactured product, proprietary to Rodlin Design. The armrests, seat and back elements are moulded components, ensuring quality, uniformity and consistency.

The seat and backrest are reinforced with Pirelli webbing for added support. Optional fire retardant foam is available on request (British Fire Rating: BS 5852: 1990, Section 5, Rating N1/5). The Wave chair incorporates acoustic damping which prevents auditory fatigue by lessening echo and reverberation while allowing the acoustics of the hall to project the desired sound to the listener.

The Wave Chair is available in two widths, 540mm and 590mm. The zinc alloy spring-loaded auto-tip mechanism is SABS 1528-1 compliant, tested for 200,000 cycles.

Designed for cost-effective maintenance, the Wave Chair is a component based fully upholstered, floor-mounted auditorium chair featuring an automatic tip-up seat. Available with common or individual armrests, Available with optional anti-panic fold-away writing tablets, media units and cupholders.

**Warranty - 5 Years**
