

# WING WS

The Wing Chair is a fully upholstered, auditorium-rated seating solution designed for high traffic environments such as lecture halls, auditoriums, and conference venues.

The seat and backrest are fully upholstered, providing a premium aesthetic and long-lasting durability. The seat and backrest consists of moulded foam mounted onto a 12mm cross-ply laminated board, ensuring structural integrity and designed for optimal comfort and support.

The Wing Chair incorporates an automatic tip-up seat with a zinc alloy die-cast spring-loaded mechanism, tested to 200,000 cycles for long-term performance. The metal sub-frame is epoxy powder-coated to a thickness of 70 microns, offering excellent corrosion resistance. A 50mm diameter tube cross-member provides a strong and stable base, while the laser-cut uprights, made from mild steel, ensure precision engineering and additional support. The side support plates are 5mm, contributing to the overall structural stability of the chair.

A custom writing surface is available, tailored to your specifications, with optional modesty panels.

**SANS 1528-1 Compliant**  
**Warranty - 5 Years**
