## ACO ShowerDrain channel and grating

### Domestic and residential shower drainage system

The ShowerDrain range is characterized by modern design and perfect functionality.

The design comprise of high quality stainless steel which is used for the production of the shower channel and grating.

The foul air trap is made out of polypropylene.

From the user ´s point of view the ACO ShowerDrain excelled especially by the high flow rate, very low construction height and very easy maintenance.

## Why choose the ACO ShowerDrain channel and grating ?

### Practical, flexible design options for every project

- Variety of design options
- Safe, assembly-friendly installation
- Easy accessibility
- Flat welded joints
- High drain performance with additional gullies
- Gully bodies positions fitted to individual application

## Products for every requirement

Hotel, wellness and spa facilities

Health and care facilities

Private and public residential buildings

Channel information

- Channel body:** Stainless steel
- Gully body:** Plastic
- Load class:** K3
- Internal channel width:** 80 mm
- Minimum building height:** 54 mm with inclination 1,5°
- Flow rate:** 0,4 l/s (with 10 mm build-up)  
0,46 l/s (with 20 mm build-up as per EN 1253-1)
- Outlet socket:** Suitable for all push-fit pipe socket systems
- Mounting:** Modular assembly system consisting of channel body, screwed gully body and design grating body, screwed gully body and design grating
- Flange types:** Surrounding, wall flange
- Socket version:** ND 40/ND 50
- Foul air trap:** One-piece with removeable submersible pipe
- Flexible for any installation situation**
