ROLLER BLINDS

Controlled lighting. Open views. Modern styles. Sleek design. On-trend textures, colours and fabrics.

Inspired by the global trends in fabric, design, fashion and textiles, the new Taylor Blinds extended collection boasts over 100 different elegant fabrics. The collection includes classic cotton- and linen-look fabric textures that create a balanced and calming atmosphere as well as functional screens that are perfect for light management and heat control.

ROLLER BLINDS FINISH OPTION GLOSSARY

LIGHT FILTERING

Light Filtering fabrics are sheer and allow the maximum amount of light in. They create a decorative atmosphere and filter light in a soft, beautiful and natural way. There are different types of light filtering fabrics: **transparent** versions don't have an acrylic coating whereas translucent fabrics do have acrylic coatings. **Translucent** fabrics are more sheer.

DIM OUT

Dim Out blinds are 90% Block Out. They impede the view from both inside and outside. Dim Out fabrics beautifully filter the sunlight, while still creating a diffuse light in the interior. These blinds are often used in kitchens, living rooms and dining rooms. Dim Out blinds let a small amount of light in. The material is not too thick or thin as there is only one solid coating layer on the back (versus Block Out, which has three).

SCREEN

Screen fabrics allow in plenty of light – yet protect you, your flooring and furniture from UV rays and glare. They are wonderful as energy-saving blinds as they maintain a temperate climate in your room. They provide a great level of privacy during the day, however the opposite is true at night. Screens combine function and beauty: with their functional properties and architectural look and feel, screens are perfectly suited to large windows.

BLOCK OUT

Thanks to their coating on the back side, Block Out roller fabrics completely **Block Out** light, which makes them perfect for the bedroom, boardroom or nursery room. Select between various fabric finishes to complement your décor, and your **choice of PVC or PVC-free** fabric properties.

MELBOURNE LIGHT FILTERING

The robust, natural linen look of this fabric creates the warm feeling of being close to nature. This fabric is suitable for moist and humid environments.

Ice

SHEERWEAVE SCREEN

Our Sheerweave fabric is a revolutionary screen, manufactured using DOW ecolibrium bio-based plasticisers, rather than fossil-fuel-based plasticisers. DOW ecolibrium does not detract from the screen's appearance or performance, and provides a sustainable green alternative to traditional screens, without a PVC fragrance. The application of this treatment also means it will protect and defend your fabric against bacteria, mould, fungi, yeast and algae.

TECHNICAL FEATURES

- Low Carbon Footprint
- Good UV Control
- Glare and Heat Reduction
- Easy to Clean
- Flame Retardant
- Automated or Manual

- C** Day / night bracket
- D** All roller blinds come with the option of Steel or Plastic chains (available in White, Black or Grey)

E Child-safety clip

ZEBRA ROLLER BLINDS

Thanks to the double layer fabric of light-filtering (transparent) and non-light-filtering (dim out) stripes, you can play with light and create a modern look. The light-filtering (transparent) stripes allow maximum light in and create a feeling of space, while the non-light-filtering (dim out fabric) darkens the room, providing you with more privacy.

TECHNICAL FEATURES

	Easy to Clean
	Suitable for Moist Conditions
	Insulation against Heat and Cold
	Automated or Manual
	Flame Retardant (Parga only)

FABRIC COLOUR CHART

PARGA

This sheer translucent, flame retardant double roller blind fabric has a delicate woven structure and a subtle silk gloss.

ZAKYNTHOS

This translucent double roller blind fabric is available in five colours. Yarns in the colour of the closed stripes have been woven into the transparent stripes.

CRITICAL INFORMATION TO NOTE

These blinds will function best if they are NOT rolled up around the cassette, revealing an open window. Zebra Roller Blinds are meant to hang permanently – only moving the blind to either a sheer fabric or a solid (dim out) fabric. If the blinds are constantly rolled up and down it could impact the fabric lines and balance, resulting in skew fabric lines. If this is not a suitable solution for you, consider the DAY/NIGHT bracket, which can house both sheer screens and block out and allow for both the blinds to be drawn up, revealing an open window.

TECHNICAL SPECIFICATIONS

Base Material:	100% PES
Sheer Fabric Finish:	Parga Fabric - Impregnated
Solid Fabric Finish:	Zakynthos Fabric - Coated
Width:	2800 mm
Sheer Fabric Thickness:	Parga Fabric - 0.19 mm
Solid Fabric Thickness:	Zakynthos - 0.31 mm
Sheer Fabric Height:	50 mm
Solid Fabric Height:	50 mm

VENETIAN BLINDS

Versatile and practical, our collection features Aluminium, Styro-Wood, Bamboo Wood, and Wood versions. The beauty of Taylor's Venetian Blind Collection is timeless and sophisticated. Bold, natural and neutral tones add a tranquil and welcoming touch to any room, framing your windows and providing shade when needed. Control the lighting, your privacy and your view with these chic, durable blinds.

WOODEN VENETIAN BLINDS

VENETIAN BLINDS

The beauty of Taylor's Wooden Venetian Blind Collection is timeless and sophisticated, a true classic taste for all seasons. These popular blinds add warmth and contemporary flair to your room or space, letting nature in to work her magic.

The natural material and neutral tones of Taylor's Wooden Venetian Blinds add a tranquil and welcoming touch to a room, framing your windows and providing shade when needed. The streamlined design adds simplicity to window dressings and a classic, contemporary feel. The blinds are durable and versatile.

Taylor's Venetian Wood Blinds are made from wood sourced from renewable plantations in the Far East. The 50 mm slat blinds are available in a variety of subtle hues, colours and textures.

*Due to the nature of printed brochures, the most up-to-date colours should always be checked with your sales representative.

STYRO-WOOD VENETIAN BLINDS

Versatile and practical. The wood-substitute Venetian blind, Styro-Wood, is made from a polystyrene resin base and offers the benefits of a wood look and feel but without the negative characteristics that come with natural wood (e.g. warping, fading). This style of blind is therefore an ideal choice for bathrooms, kitchens or damp areas.

Styro-Wood Venetian Blinds are available in a 50 mm slat.

TECHNICAL FEATURES

	Easy to Clean
	Easy to Pull Up
	Cords, Tapes, Head and Bottom Rails are Colour Co-ordinated
	Styro-Wood Range is Suitable for use in Damp Areas (e.g. bathrooms)

AVAILABLE COLOURS*

BAMBOO WOOD VENETIAN BLINDS

Inspired by nature. Perfected by Taylor. Taylor's Bamboo Venetian Blinds are perfect for creating a serene and nurturing environment with a touch of strength and elegance. Bamboo Wood Venetian Blinds offer many unique design benefits: they lend elegance to almost any room décor and their durability makes them reliable, as they fulfil the functions of the traditional blind with little to no maintenance.

Bamboo Wood Venetian Blinds are eco-friendly and this, as many agree, is a big part of the natural ambiance that bamboo blinds lend to a room. The natural elements of bamboo make it a perfect material for use in the manufacturing of window-covering products. They are deceptively durable and can withstand sunlight for extended periods of time.

TECHNICAL FEATURES

	Can be Fitted to any Window or Door
	Easy to Clean and Easy to Pull Up
	Cords, Tapes, Head and Bottom Rails are Colour Co-ordinated
	Made from Natural Materials
	Bamboo has a Special UV Protective Coating

ALUMINIUM VENETIAN BLINDS

Blinds for the contemporary and trendy. Our modern range of made-to-measure Aluminium Venetian Blinds offers a wide variety and choice of colours, finishes and trend-led designs inspired by global architecture. Control the lighting, your privacy and your view with chic, durable Aluminium Venetian Blinds.

The aluminium slats are available in 25 mm and 50 mm width. The stainless steel pins are used to ease the cord pull, which means they won't corrode, rust or damage the cords.

Aluminium 50 mm in Nordic White

25 mm Nordic White

VERTICAL BLINDS

The simplicity of Taylor's Vertical Blinds creates a chic and trendy window dressing and is especially popular in offices and contemporary homes. Vertical Blinds are back in fashion for home décor too. They work with any size window or patio door – parting left, right or splitting evenly on either side – and their perfect straight lines allow you to control the light that enters a room, your privacy and your views.

They are easy to clean and offer excellent insulation against heat and cold. The washable fabric strips are available in widths of 90 mm and 127 mm and you have a variety of colours and textures to choose from, including a total Block Out PVC option. Our patented stainless steel rods will not corrode, and guarantee years of trouble-free service.

MOTION

Taylor's MOTION technology makes life easier, safer and more sustainable. Your roller blinds can now be motorised and automated to open and close at the pull of a cord, click of a button, from the command of your voice, and even when you're not there, thanks to our MOTION smartphone app.

MOTION

MOTION

TAYLOR MOTION

The MOTION app makes it possible to control window coverings from anywhere in the world by smartphone, and to programme scenes and timers.

MOTION enables voice control through smart speakers.

The app, If This Then That (IFTTT) links an array of other applications, resulting in smart homes that are fully adapted to the users' lifestyle.

FEATURES:

- Pull of a Cord
- Click of a Button
- Command of your Voice
- App Control
- Smart Home Connectivity

Smart home window coverings for homes and buildings. Smart. Safe. Simple.

SOMFY MOTION

Control your interior blinds using a remote control, tablet or smartphone.

Play with natural light, and create your own ambiances to achieve privacy, peace and tranquillity.

Thanks to their sun sensors, your motorised interior blinds become smart and connected, allowing them to adjust automatically to outside conditions. As a result, they'll help you control your energy spending much more effectively.

BENEFITS:

- Improved thermal & visual comfort
- Reduced maintenance costs
- Energy savings
- Infinite architectural possibilities
- 5-year guarantee, subject to wear and tear
- Motorised / Battery Operated Available

3 DIFFERENT OPERATING SYSTEMS

PULL OF A CORD.

Pull control is a steady add-on to remote and smart operating options. Having the option to manually override can be very useful.

Plastic White Wand Stainless Steel Tassel Pull Cord

CLICK OF A BUTTON.

Various blinds can be combined in operating channels, allowing entire rooms or scenes to be controlled with the press of a button.

5 channel remote

COMMAND OF YOUR VOICE.

SMART HOME CONNECTIVITY

By adding just one component, the MOTION Wi-Fi bridge, unlocks as many as three new control options:

CMD 01 WIFI BRIDGE

- App control
- Voice control
- If This Then That (IFTTT)

APP CONTROL

The MOTION app makes it possible to control window coverings from anywhere in the world by smartphone, and to programme scenes and timers. MOTION enables voice control through smart speakers. The app, If This Then That (IFTTT) links an array of other applications, resulting in smart homes that are fully adapted to the users' lifestyle.

Compatible with different types of blinds.

Set the blind to any desired position: for example, "Set blinds to 60%".

Create rooms with multiple blinds.

Set scene with preset position: for example, "Morning blinds go up".

Add timer to automate scenes.

MOTORISATION

Designed to provide convenience, comfort and energy savings, Somfy's automated solutions are an important enhancement for homes and commercial buildings. At the push of a button, or automatically, they will open or close, providing shade and privacy.

Motorised blinds add a level of ease and convenience with the touch of a single button.

Blinds are an essential addition to a home or office's energy-savings. Your windows release a lot of the temperature from within a home or office building – heat in winter and coolness in summer. Electric motors for interior shades or blinds are easy to operate and work smoothly to keep your window coverings beautiful and functioning longer.

YOUR RESPONSE TO COMMERCIAL BUILDING REQUIREMENTS

Design-inspired, sustainable architecture with bioclimatic façades performance is the driving force behind our product development processes.

Sonesse® motors are compatible with Somfy's bioclimatic façade management systems. They act as automatic, intelligent filters that adjust the amount of natural light let in without affecting noise levels.

PEOPLE: OUR NUMBER ONE PRIORITY

Silence, simplicity, privacy, thermal comfort, natural light quality and sustainable performance are the driving forces behind our product development processes.

Sonesse® range offers an unrivalled choice of motors and accessories designed with occupant well-being.

SOMFY CONNECTED SOLUTIONS

A FULLY CONNECTED HOUSE - THE 3 KEY FUNCTIONS OF THE APP

OPENING

- Multi-equipment: over 100 devices by Somfy are compatible with TaHoma
- Multi-brand: connected home devices and appliances from the major brands are compatible with TaHoma

INTUITIVE

- Customised interface
- 3 intuitive menus:
 - Scenario: to create connected life moments
 - Agenda: to live in line with your desires
 - Smart: to define advanced programming (sensors, detectors, clock, etc.)

SIMPLICITY

- Simple to install: each device added without reconfiguring the system.
- Easy to use.

Explore a new way to control the solar protection devices. Just by using a smartphone, Connexoon Window RTS application controls our motorised solutions such as interior blinds, in just one click. Intuitive, smart, playful and in keeping with the times, the application offers greater comfort and peace of mind for a better home experience.

CENTRALISATION

One click to open and close all the devices.

TIMER

Programming for the equipment at preferred times each day, to simulate presence.

AMBIANCE REPLAY

Run programmed ambiances with 1 click. For instance, run the "Film Evening" ambiance to close the sitting room curtains, turn on the lights, and close all the devices.

EXCLUSIVE PRECONSTRAINT® TECHNOLOGY

Patented worldwide, the Préconstraint® technology by Serge Ferrari involves keeping the composite under tension throughout the manufacturing cycle. It gives our materials exceptional performance that enable them to surpass market standards in terms of dimensional stability, mechanical strength, coating thickness and flatness.

- **High-tenacity polyester micro-yarn base cloth**
Superior elongation and tear resistance
- **A coating with fabrics under biaxial constant tension in both warp and weft directions**
No deformation during processing and use
- **Greater coating at the top of the yarns and a dirt-resistant surface treatment**
Superior aesthetic and mechanical durability
- **Exceptional flatness and thinness**
Smooth finish, easy to clean, space-saving and easy rolling

QUALITY. INNOVATION. TRUST.

WHO ARE WE?

For over 60 years, Taylor has been synonymous with providing service excellence and innovative, elegant, quality products. Be it stylish aluminium or wood-substitute shutters, contemporary security gates, the streamlined simplicity of venetian, vertical, roller or woven blinds, Taylor has the perfect solution for your home or office.

Taylor innovation is savvy – merging design and functionality to provide stylish, sleek and practical window and door covering custom-made solutions.

WHY WE'RE DIFFERENT?

We know everyone has unique tastes so we work alongside home owners, designers and architects to provide Taylor-made-to-measure, locally manufactured, top quality products that are delivered and installed within our committed time frame to you.

We pride ourselves in our quality and service and offer a warranty on all products manufactured in our factory, that they will be free from defects in material and workmanship, for a set period ranging from 2 to 10 years from date of delivery. This warranty is given subject to certain conditions.

QUICK TURNAROUND

We have an 8000 m² purpose-built factory and are able to manufacture within a maximum of two weeks from signed-off order*. Our service ethic includes the highest quality control, which is why we confidently offer 2- to 10-year warranties, depending on the product.

SECURITY WITH STYLE

Security shouldn't come at the expense of style. ShutterGuard® Aluminium Shutters are stylish, rustproof and perhaps, more importantly, through innovative construction, they also provide high-end security when closed. So you'll have complete peace of mind when away from home. Think of it as a haute couture suit of armour.

*Excluding delivery, which requires 5 working days.
