THE MATERIAL

GENEVA BLOCKOUT

Geneva Blockout material is the perfect choice for those seeking maximum privacy and light control in their homes and offices.

The advanced technology used in this fabric ensures that it blocks out sunlight completely, creating a dark and comfortable environment for you to work or rest in.

MOLD & DUST RESISTANT

EASY TO MAINTAIN

This advanced fabric is not only designed to block out light but is also incredibly easy to maintain.

The material is mold and dust-resistant, meaning you can enjoy clean and fresh blinds all year round. Simply wipe them down with a damp cloth to remove any dirt or dust that may have accumulated, and they'll look as good as new.

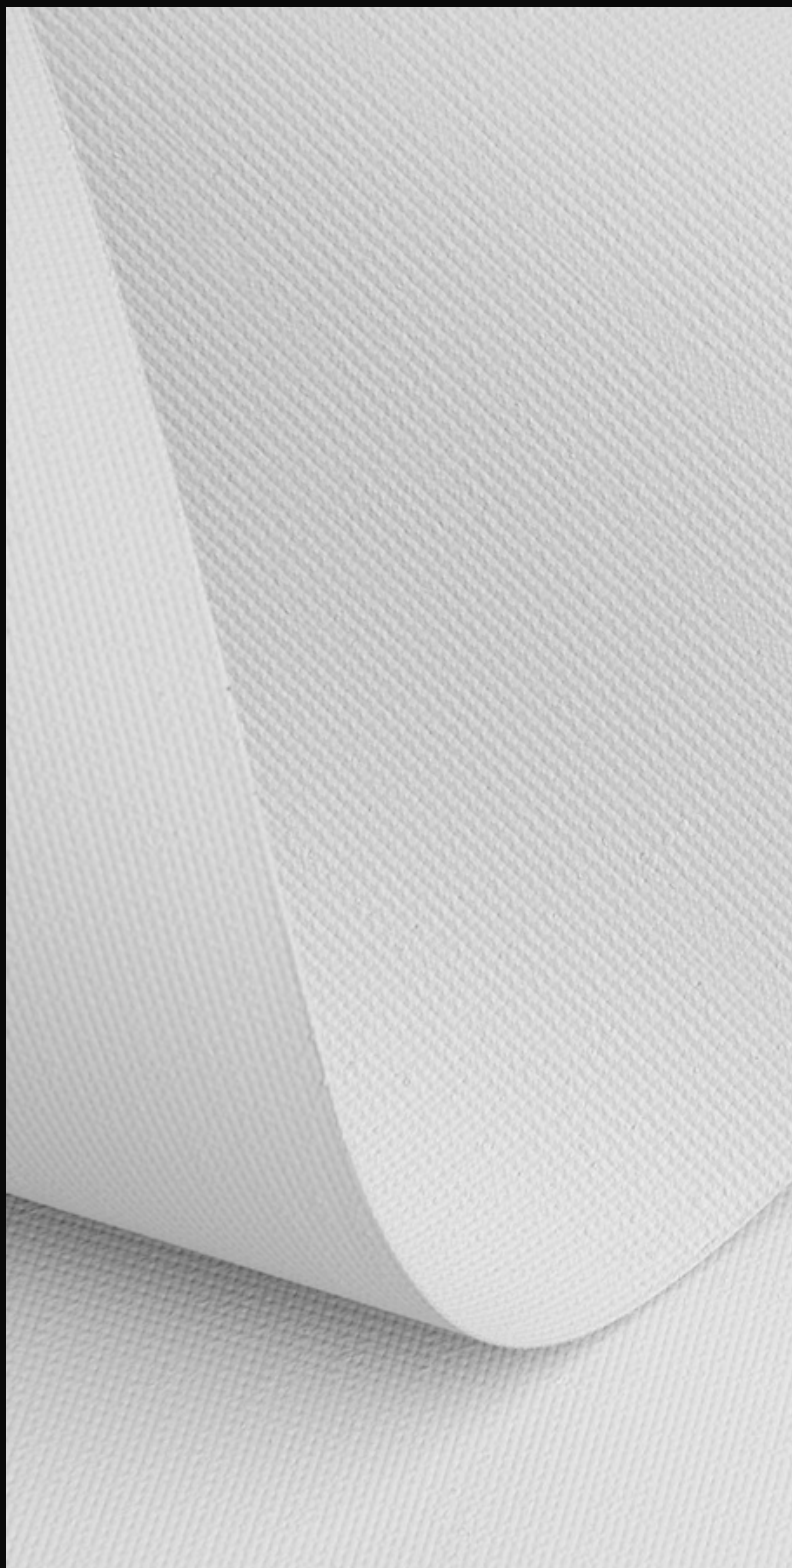

ENERGY EFFICIENT

Geneva Blockout is designed to prevent heat from entering or escaping through windows, thereby reducing the need for heating and cooling systems to work overtime. Geneva Blockouts are made from a thick, insulating material that effectively traps air between the window and the room, providing an additional layer of insulation.

QUALITY GUARANTEED

DURABLE & RELIABLE

Geneva Blockouts are known for their high durability and longevity. These roller blinds are made from high-quality materials that are designed to withstand wear and tear over time. The insulating material used in Geneva Blockouts is resistant to fading, tearing, and discoloration, ensuring that they maintain their appearance and performance for years to come.
