THE MATERIAL

BEAUTIFUL & FUNCTIONAL

Honeycomb/Duet blinds, also known as cellular blinds, are a stylish and versatile window treatment option designed to enhance both the aesthetic appeal and functionality of your space.

These blinds are crafted with a unique cellular structure, featuring a series of honeycomb-shaped pockets that trap air, providing excellent insulation for your windows.

A RANGE OF BENEFITS

ACCORDING TO YOUR PREFERENCE

Beyond their energy-saving properties, honeycomb/duet blinds offer a range of benefits. They provide exceptional light control, allowing you to adjust the amount of natural light entering the room according to your preference. With the Vario (top-down, bottom-up) operation, you can maintain privacy while still enjoying a view and natural light from above or below.

These blinds come in a variety of fabric options, colors, and opacities, allowing you to customize them to complement your interior design scheme. Whether you desire a sheer, light-filtering effect or a room-darkening solution, honeycomb/duet blinds can accommodate your needs.

SOUND ABSORPTION

PEACEFUL ATMOSPHERE

The cellular design of these blinds also makes them an excellent choice for sound absorption, reducing outside noise and creating a more peaceful atmosphere within your living or working space.

Additionally, they provide an added layer of insulation against heat and cold, helping to regulate indoor temperatures and potentially reducing energy costs.

HARDWARE

HONEYCOMB HARDWARE

Our Varilux Honeycomb Blinds are equipped with top-quality aluminium and stainless steel hardware, ensuring durability, reliability, and a sleek aesthetic. The carefully selected materials guarantee long-lasting performance and effortless functionality.

The aluminium hardware components are lightweight yet sturdy, providing exceptional structural support for the blinds. They are corrosion-resistant, ensuring resistance to moisture and maintaining their integrity even in humid environments. With their sleek and modern appearance, the aluminium hardware seamlessly complements the overall design of the blinds, adding a touch of contemporary elegance to your space.

The stainless steel hardware used in our Varilux Honeycomb Blinds is renowned for its strength, durability, and resistance to rust and tarnish. The robust stainless steel construction ensures that the blinds operate smoothly and effortlessly, allowing for easy adjustments and precise control of light and privacy. The stainless steel hardware is not only highly functional but also visually appealing, with its timeless and polished finish enhancing the overall aesthetic of the blinds.

With a combination of aluminium and stainless steel hardware, our Verisol Standard Pleated Blinds offer a winning combination of durability, reliability, and aesthetic appeal. Experience peace of mind knowing that your blinds are equipped with high-quality hardware that will withstand the test of time, ensuring smooth operation and maintaining their attractive appearance for years to come.
